

CHILLING HOURS DEFINED: Chilling refers to the number of hours, 45 degrees F and under, during the dormancy period. All fruit and nut trees need a specific amount of chilling hours before they will produce fruit. The amount varies with each variety and the hours need not be continuous. In the description of the fruit tree, 800 hours (for example) means it needs that many minimum hours of chilling time.

FRUIT TREES

APPLE

ARKANSAS BLACK SPUR APPLE Large, later season. Dark red skin, high quality even where summer nights are warm. For dessert and cooking. Keeps many months. 800 hours. Partly self-fruitful.

ASHMEAD'S KERNEL Many think of this apple as one of the all-time best flavored. Small to medium fruit, used for dessert, cider, and sauce. Good keeper. 800 hours. Best with pollinizer.

BELLE DE BOSKOOP APPLE Outstanding cooking, pie and dessert apple. Heavy crops of large to very large fruits. Green and red skin in patches, with a brown russet extending from base. Coarse, crisp, juicy white flesh is sweet-tart to sub-acid. Keeps well, very late harvest. 800-1000 hours. Sterile pollen, pollinizer required.

BRAEBURN APPLE New from New Zealand. Superb late season fruit. Very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours (est.). Self-fruitful.

NEW BURGUNDY APPLE Glossy dark red, medium to large fruit. Excellent dessert apple, good fresh too. Ripens early August. 500-600 hours. Needs pollinizer.

COX ORANGE PIPPIN APPLE Old favorite dessert apple. Firm, juicy, sweet, rich flavor, not tart. Distinctive aroma. Skin is orange-red to bright red over yellow. Prefers moderate climate. Mid season. 800 hours. Self-fruitful.

FUJI APPLE California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull, reddish-orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Less than 500 hours. Self-fruitful.

EZ-PICK FUJI APPLE Same characteristics as Fuji above; EZ-Pick trees have been consistently pruned to stay small with low branching. They are approximately 21" tall with branching above 15." Must continue to prune to maintain smaller size.

GALA APPLE (original Gala) Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish over yellow. Early harvest. Good pollinizer for other varieties. Adapted to cold and warm winter climates. Less than 500 hours. Self-fruitful.

GOLDEN DELICIOUS APPLE (Yellow Delicious) Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Mid-season harvest, Sept in Central Cal. 700 hours. Self-fruitful.

GOLDEN RUSSET APPLE Crisp, aromatic, creamy yellow flesh with great flavor and sugary juice. Medium sized. Used fresh and for cider, drying and cooking. Winter hardy, vigorous tree with good disease resistance. 800 hours. Partly self-fruitful.

GRANNY SMITH APPLE Large, late, green, crisp, tart, excellent keeper. Requires long summer, thrives in hot climates. 600 hours. Good pollinizer for other apples. Self-fruitful.

GRAVENSTEIN APPLE (Red Gravenstein) Famous for sauce and baking, also used fresh. Crisp, juicy flavor, tart green with red stripes. Early bloom, early harvest. 700 hours. Pollen sterile. Pollinizer required – Empire, Fuji, Gala, Red Delicious.

HONEYCRISP APPLE Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy, with aromatic flavor. Striped red over yellow color. Stores well. Ripens in late September to late October. Pollinated by Fuji, Gala, or Golden Delicious.

HUDSON'S GOLDEN GEM APPLE One of the largest and best-flavored russet apples. Crisp, sugary, juicy flesh. Flavor described as nutty by some, pear-like by others. Good keeper. Medium sized tree, resistant to scab, mildew and fireblight. Ripens mid-Sept. 800-1000 hours. Partly self-fruitful, best crops with pollinizer.

JONAGOLD APPLE Superb flavor – connoisseur's choice. A cross of Jonathan and Golden Delicious. Yellow with red-orange blush. Crisp, juicy, sub-acid, all purpose. 700-800 hours. Pollinated by Fuji, Gala, Granny Smith, or Red Delicious, but not Golden Delicious.

MCINTOSH APPLE (Rogers McIntosh) Round, bright to dark red over green, superb quality in cool climates. Crisp, aromatic, sweet, subacid. Dessert/cooking. Early harvest. 900 hours. Partly self-fruitful, or pollinated by Red Delicious, Gala, or other.

MUTSU (CRISPIN) APPLE A favorite of connoisseurs: very large, crisp, and flavorful. Late September/October harvest. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 600 hours. Pollen sterile - pollinated by Red Delicious, Granny Smith, Fuji, Gala.

PINK LADY APPLE (Cripps Pink) New hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late Oct in Central Cal. Self-fruitful. 4-500 hours.

EZ-PICK PINK LADY APPLE Same characteristics as Pink Lady above; but EZ-Pick trees have been consistently pruned to stay small with low branching. They are approximately 21" tall with branching above 15." Must continue to prune to maintain smaller size.

APPLE

PINK PEARL APPLE Unusual pink-fleshed, highly aromatic fruit. Medium size, cream and pale green skin, sometimes blushed red. Tart to sweet-tart, depending on time of picking. Early fall harvest. Good keeper. Makes colorful, tasty applesauce. 600 hours. Pollenizer required.

RED DELICIOUS APPLE (Bisbee spur) Sweet, crisp, flavorful - perhaps the best Red Delicious. Early fall harvest. Small, compact tree. Good pollenizer for most other apples. 700 hours. Pollinated by Liberty, Granny Smith, Golden Delicious, Fuji, Gala.

RED FUJI APPLE (BC#2) Redder-skinned sport of Fuji. Sweet, very crisp, and flavorful; excellent keeper. Ripe Sept-Oct in Central Cal. Excellent pollenizer for other apples. Self-fruitful.

SIERRA BEAUTY APPLE Favorite late apple in No. Calif. Yellow with red blush, rich sprightly flavor, moderately sweet. Excellent fresh or cooked. 700-800 hours. Self-fruitful.

SPITZENBURG (ESOPUS) APPLE Old variety, regarded by some connoisseurs as the very best dessert apple. Red over yellow skin, yellowish flesh. Firm, juicy, moderately sweet, renowned flavor. Good keeper. 800 hours. Pollenizer required.

TRANSCENDENT CRABAPPLE Yellow skin with pink or red blush to almost entirely red. Up to 2 inches wide. Creamy yellow flesh is crisp, juicy and flavorful. Late summer harvest. Medium-sized tree, consistent crops. 7-800 hours. Self fruitful.

TYDEMAN'S LATE ORANGE This apple has consistently better quality and flavor in hot summer climates. Good keeper with reddish-orange stripes over greenish-yellow color. Yellow flesh is firm and juicy. 800-1000 hours. Pollenizer required.

WINESAP APPLE (Stayman Double Red Winesap) Long-time favorite late red apple. Juicy, smooth texture. Lively flavor, used fresh or cooked. 800 hours. Pollen sterile. Pollinated by Red or Golden Delicious, Fuji, Gala, Liberty.

YELLOW NEWTON PIPPIN APPLE Yellow-green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest till cheeks are blushed yellowish green (late Oct./early Nov. in Central Cal). Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. 700 hours. Self-fruitful.

MULTI-BUDDED APPLES

3-N-1 APPLE

6-N-1 ESPALIERED APPLE

SPECIAL ORDER APPLES

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they must be pre-ordered with us by November 8, 2010. Other sizes and root stocks are also available. Please ask a sales associate for more information.

AKANE APPLE (SPECIAL ORDER) Especially nice red dessert apple derived from Jonathan - sweet, rich, spicy flavor. Resists scab and powdery mildew. Harvest in early season (Aug in Central Cal). 800 hours. Pollenizer required. *Must order by 11/8/10.*

ANNA APPLE (SPECIAL ORDER) Remarkable fruit for mild-winter climates. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. 200 hours. Self-fruitful or pollinated by Dorsett Golden or Einshemer. *Must order by 11/8/10.*

BEVERLY HILLS APPLE (SPECIAL ORDER) Long-time favorite summer apple for coastal California. Pale yellow, red blush or stripes. Medium size, slightly tart. Fresh/cooked. 300 hours. Self-fruitful. *Must order by 11/8/10.*

BRAMLEY'S SEEDLING APPLE (SPECIAL ORDER) England's favorite cooking apple. Large with very tart, creamy yellow flesh, great for pies and sauce. Fully ripened fruit is firm, juicy, less tart and suited to fresh use. Heavy bearing and disease-resistant. 800-1000 hours. Sterile pollen, pollenizer required. *Must order by 11/8/10.*

CALVILLE BLANC APPLE Classic French dessert apple, also excellent for cooking and cider. Flattened, round shape with prominent, uneven ribs near the base. Vigorous grower with weeping side limbs. Pick green, then turns yellow, with best flavor 1 month after picking. 800-1000 hours. Pollenizer required. *Must order by 11/8/10.*

CORTLAND APPLE (SPECIAL ORDER) Large red apple. Long-time favorite in eastern US for fresh eating, cooking & cider. Sweet-tart, flavorful, non-browning white flesh. Precocious, productive tree, hardy to -40°. 800 to 1000 hours. Self-fruitful. *Must order by 11/8/10.*

DOLGO CRABAPPLE (SPECIAL ORDER) Long-time favorite all-purpose crabapple. Large, fragrant white flowers. Fruit makes tasty, bright-red jelly. Vigorous, upright, open tree to 30 feet x 25 feet, depending on conditions. Resistant to scab, rust, mildew, fireblight. 500 hours. Self-fruitful. *Must order by 11/8/10.*

DORSETT GOLDEN APPLE (SPECIAL ORDER) Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Good early season sweet apple for Central Cal. 100 hours. Self-fruitful. *Must order by 11/8/10.*

EINSEMER APPLE (SPECIAL ORDER) Heavy-bearing, very low chilling requirement. Sweet yellow apples in early summer (late June in Central Cal). Excellent pollenizer for Anna. 100 hours. Self-fruitful. *Must order by 11/8/10.*

EMPIRE APPLE (SPECIAL ORDER) Sweet and juicy, sprightly flavor, a cross of McIntosh and Red Delicious. McIntosh-type apple for hot summer climates. Heavy bearing tree. Early fall harvest. 800 hours. Self fruitful. *Must order by 11/8/10.*

GORDON APPLE (SPECIAL ORDER) Popular variety for So. Cal. Low chilling requirement, about 400 hours. Red over green skin, good quality. For fresh use and cooking. Self fruitful. *Must order by 11/8/10.*

HARALSON APPLE (SPECIAL ORDER) Extremely winter hardy tree. Med-sized fruit is red-striped to solid red. Firm, crisp, juicy with a mild, slightly tart flavor. Used fresh, for cider and baking. Early harvest. Excellent keeper: retains its quality for 4-6 months. Vigorous, heavy-bearing tree. 1,000 hours. Self fruitful. *Must order by 11/8/10.*

KING APPLE (Tompkins King) (SPECIAL ORDER) Large, old-time red-striped apple with classic flavor. Used for dessert, cooking, and cider. Ripens mid-season. Horizontal limbs, spreading growth habit. 800-1000 hours. Sterile pollen; pollinizer required. *Must order by 11/8/10.*

LIBERTY APPLE (SPECIAL ORDER) Disease-resistant, & cold hardy. Resists scab, rust, mildew, fireblight. Solid red. Crisp, rich sprightly flavor. Fresh or cooked. Early fall harvest. 800 hours. Self fruitful. *Must order by 11/8/10.*

MELROSE APPLE (SPECIAL ORDER) A favorite home orchard variety in Oregon's Willamette Valley. Very juicy, slightly tart, high quality fruit for dessert and cooking. Keeps 2-3 months. Medium to very large size, shape varying from flattened to conic. Mid to late-season bloomer, good pollinator for other apples. 800-1000 hours. Partly self-fruitful, biggest crops with cross-pollination. *Must order by 11/8/10.*

MOLLIE'S DELICIOUS APPLE (SPECIAL ORDER) A favorite Red Delicious-type apple for mild winter climates. Sweet, flavorful, aromatic. Red blush over yellow. 4-500 hours. Pollinizer required. *Must order by 11/8/10.*

NORTHERN SPY APPLE (SPECIAL ORDER) Large, fruit is firm and aromatic with a lively, tart flavor. Greenish-yellow skin with red blush or stripes. Dessert/cooking, excellent keeper. Winter hardy, vigorous tree. Slow to begin bearing. 1000 hours. Pollinated by Golden Del. *Must order by 11/8/10.*

PETTINGILL APPLE (SPECIAL ORDER) Very low winter chilling requirement, about 100 hours. Large fruit with red over green skin, ripening late Sept to mid-Oct in coastal So. Cal climates. Crisp and juicy, with a balance of sugar and acid. Good keeper. Large, vigorous, productive tree. Self-fruitful. *Must order by 11/8/10.*

RED DELICIOUS (Harold) APPLE (SPECIAL ORDER) Early fall fruit is sweet, crisp, fine-flavored. Vigorous, productive tree. Good pollinizer for almost all other apples. 700 hours. Pollinated by Fuji, Gala, Granny Smith, or Golden Delicious. *Must order by 11/8/10.*

ROME BEAUTY APPLE (SPECIAL ORDER) Late blooming, a good choice where hard freezes in late spring are common. Large, round, red, used primarily for cooking. Heavy bearing. Late harvest. 1000 hours. Self-fruitful. *Must order by 11/8/10.*

SNOW (Fameuse) APPLE (SPECIAL ORDER) Famous for its pure white flesh and spicy, aromatic, subacid flavor. Small to med-sized fruit w/ light red stripes. Used primarily for dessert, also for cooking and cider. Oct harvest, keeps till the holidays. Very hardy, long-lived, heavy-bearing tree. 600 hours. Partly self fruitful. *Must order by 11/8/10.*

SPARTAN APPLE (SPECIAL ORDER) McIntosh-type dessert apple, but firmer. Pure white flesh is crisp, juicy, highly aromatic, fine-flavored. Med size, with dark red skin. Early harvest. Keeps several months. Resistant to scab, mildew and fireblight. Winter hardy, precocious, heavy-bearing tree. 800-1000 hours. Self-fruitful; bigger crops if cross-pollinated by Lodi, Wealthy, or Liberty. *Must order by 11/8/10.*

WHITE WINTER PEARMAIN APPLE (SPECIAL ORDER) High quality, all-purpose apple - an old favorite. Widely adapted, including mild-winter coastal climates. Cream-colored flesh is fine-grained, crisp, juicy and aromatic with a rich, subacid to sprightly flavor. Good keeper. Healthy, vigorous, spreading, heavy-bearing tree. Excellent pollinator for other apples. 400 hours. Self fruitful. *Must order by 11/8/10.*

WINTER BANANA APPLE (SPECIAL ORDER) Large, round, pale yellow waxy skin blushed with rosy pink. Crisp, tangy, juicy flesh is aromatic with a mild, banana-like flavor. Long-time favorite dessert apple and good cider apple. Harvest mid to late-Sept in Central Cal. Good keeper. Vigorous. Excellent pollinator for other apples. 400 hours. Partly self fruitful, biggest crops if cross-pollinated. *Must order by 11/8/10.*

WOLF RIVER APPLE (SPECIAL ORDER) Famous for its frequently huge size, used primarily for cooking, also good fresh and dried. Firm, juicy flesh is slightly aromatic, with a distinctive, mild, subacid flavor. Early harvest. Very winter hardy, disease-resistant, long-lived. 1,000 hours. Partly self-fruitful, or cross-pollinate with another late-blooming variety such as Northern Spy, Melrose, or Golden Delicious. *Must order by 11/8/10.*

YELLOW BELLFLOWER APPLE (SPECIAL ORDER) Long-time favorite pie and sauce apple, also excellent fresh and for making hard cider. For winter dessert use, the fruit may be picked while still tart; it mellows in storage, reaching peak flavor and acid-sugar balance after a few months. Fruits vary in size. Mid-Sept harvest in Central Cal. 400 hours. Mid-season bloom. Pollinizer required. *Must order by 11/8/10.*

YELLOW TRANSPARENT APPLE (SPECIAL ORDER) Long-time favorite cooking apple for the early summer (June to early July in most climates). Crisp, juicy and flavorful: excellent for sauce and pies, and fresh or dried. In hot summer climates, begin picking while fruit is still green and tart. Season lasts 3-4 weeks. Winter hardy, vigorous, begins bearing very young. 800-1000 hours. *Must order by 11/8/10.*

YORK APPLE (York Imperial) (SPECIAL ORDER) One of the best apples for keeping: holds its flavor till April or May. Fine quality for dessert use, excellent for baking and cider. Late harvest. Fairly large tree is moderately winter hardy, late-blooming, disease resistant. At its best on heavier clay soils. 800-1000 hours. Self fruitful. *Must order by 11/8/10.*

APRICOT

BLenheim (ROYAL) APRICOT All-purpose freestone, sweet, aromatic, flavorful. Long time #1 apricot in California. Early bloom. Late June harvest in Central Calif. 500 hours. Self-fruitful.

HARCOT APRICOT From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid June in Central Cal. Sweet, juicy, rich flavor - one of the best. 700 hours. Self-fruitful.

HARGLOW APRICOT Late-blooming, productive tree, proven producer in coastal Northwestern climates. Medium size, bright orange fruit sometimes blushed red. Orange freestone flesh is firm, sweet, flavorful. Resistant to perennial canker and brown rot, resists cracking. 800 hours. Self-fruitful.

TOMCOT APRICOT Consistently productive apricot. The most dependable producer in marginal climates, by far. Large, orange fruit with firm, sweet flesh. Early harvest. 600 hours. Partly self-fruitful, best with another apricot like Harcot or Harglow.

SPECIAL ORDER APRICOTS

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they must be pre-ordered with us by November 8, 2010. Other sizes and root stocks are also available. Please ask a sales associate for more information.

AUTUMN GLO APRICOT (SPECIAL ORDER) Late season apricot with tremendous flavor. Ripens in the first two weeks of August. Fruit is medium sized with good color. *Must order by 11/8/10.*

CANADIAN WHITE BLENHEIM APRICOT (SPECIAL ORDER) Syrupy sweet white flesh with firm texture. Taste test winner. 500-700 hours. Partly self-fruitful. Biggest crop if cross-pollinated. *Must order by 11/8/10.*

CHINESE (Mormon) APRICOT (SPECIAL ORDER) Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult, spring frost-prone climates. 700 hours. Self-fruitful. *Must order by 11/8/10.*

EARLI AUTUMN APRICOT (SPECIAL ORDER) Wonderful flavor both fresh and dried. It will please even the most critical of apricot lovers. Late harvest, first two weeks of August. *Must order by 11/8/10.*

FLAVOR GIANT APRICOT (SPECIAL ORDER) One of the earliest fruits of the year (late May/early June in Central Cal). Heavy crops of extremely large, sweet/tart, flavorful fruit. 600 hours. Self-fruitful. *Must order by 11/8/10.*

FLORA GOLD APRICOT (SPECIAL ORDER) All-purpose freestone. Early harvest. Very good quality, reliable producer (produces when other varieties don't). Good choice for backyard apricot. 500 hours. Self-fruitful. *Must order by 11/8/10.*

GOLDKIST APRICOT (SPECIAL ORDER) Excellent backyard apricot for warm winter climates. Freestone, very good quality. Heavy bearing. Early harvest. 300 hours. Self-fruitful. *Must order by 11/8/10.*

KATY APRICOT (SPECIAL ORDER) Large, all-purpose flavorful freestone. Fruit is subacid (not tart). A favorite apricot for warm-winter climates. Early harvest, 400 hours. Self-fruitful. *Must order by 11/8/10.*

MOORPARK APRICOT (SPECIAL ORDER) Long-time favorite of apricot fanciers for its exceptionally rich flavor and aroma. Reliable producer. Used fresh and for canning. 600 hours. Self-fruitful. *Must order by 11/8/10.*

NUGGET APRICOT (SPECIAL ORDER) Large, flavorful yellow freestone. Attractive orange skin blushed with red. Ripens mid-June in Central Calif. Vigorous, productive tree. 500 to 600 hours. Self-fruitful. *Must order by 11/8/10.*

PUGET GOLD APRICOT (SPECIAL ORDER) Proven producer of large, flavorful fruit in Western Wash. Recommended for climates where spring rains and frosts limit apricot culture. August harvest. 600 hours. Self-fruitful. *Must order by 11/8/10.*

ROYAL ROSA APRICOT (SPECIAL ORDER) Extremely vigorous-more disease tolerant than other apricots. Bears young and heavy. Especially nice fruit: sweet, low acid, fine flavor. Very early harvest (late May in Central Cal). Excellent backyard apricot. 500 hours. Self-fruitful. *Must order by 11/8/10.*

TILTON APRICOT (SPECIAL ORDER) No. 1 apricot for canning, excellent fresh or dried. Medium to large, firm, rich flavor. Widely adapted. 600 hours. Self-fruitful. *Must order by 11/8/10.*

WENATCHEE MOORPARK APRICOT (SPECIAL ORDER) Recommended for western climates where spring rains and frosts limit apricot culture. Flavorful fruit used fresh, dried, canned. 700 hours. Self-fruitful. *Must order by 11/8/10.*

CHERRY

BING CHERRY Large, firm, juicy, sweet, nearly black when ripe - superb flavor, #1 cherry. Mid-season. Large, vigorous tree. 700 hours. Pollenized by Black Tartarian, Van, Rainier. Also Stella in colder climates.

BLACK TARTARIAN CHERRY Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries.

CRAIG'S CRIMSON CHERRY Taste test winner. Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard. Mid-season. 800 hours.

APRICOT - CHERRY

ENGLISH MORELLO SOUR CHERRY Late-ripening tart cherry used for cooking, sometimes eaten fresh when fully ripe. Dark red to nearly black fruit with dark juice. Small, round-headed tree. 700 hours. Self-fruitful.

LAPINS CHERRY Self-fruitful dark red sweet cherry. Large, firm, good flavor. Similar to Van in color, Bing in shape. Great pollinator for Bing. Sometimes sold as "Self-fruitful Bing." 800 hours.

MONTMORENCY SOUR CHERRY Large, light red skin with yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy and very heavy bearing. 700 hours. Self-fruitful.

RAINIER SWEET CHERRY Large, yellow with red blush. Sweet and flavorful - superior to Royal Ann. Very cold hardy. Mid-season harvest. 700 hours. Pollenizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

ROYAL RAINIER CHERRY Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Ripens early. Moderate chill requirement, 600-700 hours. Pollenizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

UTAH GIANT CHERRY Best sweet cherry, according to Utah folks. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollenizer required. Bing, Lambert, Rainier, Van.

VAN CHERRY Dark flesh, semi-sweet flavor. This cherry is heavy bearing, cold hardy, and resists cracking. Large fruit, very reliable. 900 hours. Pollenizer required: Bing, Black Tartarian, or Stella. Excellent pollenizer for other sweet cherries.

MULTI-BUDDED CHERRIES

3-N-1 CHERRY

6-N-1 ESPALIERED CHERRY

SPECIAL ORDER CHERRIES

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they *must be pre-ordered with us by November 8, 2010*. Other sizes and root stocks are also available. Please ask a sales associate for more information.

EARLY RICHMOND CHERRY (SPECIAL ORDER) Sour Cherry. Heavy-producing, widely adapted tree: vigorous and healthy in many climates and soils. Early-ripening, flavorful, juicy, bright red fruit used primarily for cooking and canning. 700 hours. Self-fruitful. *Must order by 11/8/10.*

LAMBERT CHERRY (SPECIAL ORDER) Large, black, late harvest. Highest quality, rivaling Bing. Less susceptible to cracking due to later season. 800 hours. Pollenized by Van, Rainier, or Black Tartarian. *Must order by 11/8/10.*

METEOR SEMI-DWARF CHERRY (SPECIAL ORDER) Sour Cherry. Large, bright red fruit, used mostly for cooking. Tart, juicy, meaty flesh; colorless juice. Attractive, naturally small tree (10-12 ft.) Hardy to -50°F when fully dormant. 800 hours. Self-fruitful. *Must order by 11/8/10.*

MINNIE ROYAL CHERRY (SPECIAL ORDER) Medium-sized red cherry; firm with good flavor. Ripens 11-14 days ahead of Bing. Tree is very productive with a low chill requirement: 400 to 500 hours. Pollenized by Royal Lee. *Must order by 11/8/10.*

ROYAL ANN CHERRY (SPECIAL ORDER) Long-time favorite yellow sweet cherry for eating fresh or canning. Pollenizer required. Interfruitful with Van and Black Tart, not Bing. 700 hours. *Must order by 11/8/10.*

ROYAL LEE CHERRY (SPECIAL ORDER) Medium-large red cherry; heart shaped, very firm with excellent flavor; ripens 11-14 days ahead of Bing. Very productive. Pollenized by Minnie Royal. 400-500 hours. *Must order by 11/8/10.*

STELLA CHERRY (SPECIAL ORDER) Self-fruitful - no pollenizer needed. Large, nearly black, richly flavored sweet cherry. Late harvest. Pollenizes Bing. 700 hours. *Must order by 11/8/10.*

SUNBURST CHERRY (SPECIAL ORDER) Large, dark-skinned sweet cherry similar to Stella. Resists cracking. Ripens midseason, . 800 hours. Self-fruitful. *Must order by 11/8/10.*

SWEETHEART CHERRY (SPECIAL ORDER) Large, bright red fruit with good flavor. Precocious tree requires pruning to prevent size problems. Self-fruitful. *Must order by 11/8/10.*

FIG

BLACK JACK FIG (AVAILABLE POTTED ONLY) Large, purplish-brown figs with sweet, juicy, strawberry-red flesh. Harvest Aug to Oct in Central Cal. Naturally small tree (semi-dwarf). 100 hours. Self-fruitful.

BLACK MISSION FIG (AVAILABLE POTTED ONLY) The favorite. Purplish-black skin, strawberry colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Fresh/dry/can. 100 hours. Self-fruitful.

CHICAGO HARDY FIG (AVAILABLE POTTED ONLY) Purple brown fig with great flavor. Good cold tolerance, can die back to the ground and come back and fruit the next season. Fruit produces on next season's summer growth. Self-fruitful.

DESERT KING FIG (AVAILABLE POTTED ONLY) Large green fruit with strawberry flesh. Excellent quality. Does best in cooler coastal climate, and does well in colder climates or higher elevations. Sets a large early crop between late June to August. Has a second crop in warm areas. Self-fruitful.

FLANDERS FIG (AVAILABLE POTTED ONLY) Highly productive, violet-striped fruit with white flecks. Richly flavored amber flesh that is resistant to splitting. 100 hours. Self-fruitful.

IMPROVED BROWN TURKEY FIG (AVAILABLE POTTED ONLY) Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted, coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful.

ISCHIA FIG (AVAILABLE POTTED ONLY) Green skin flushed with purple. White to light strawberry colored flesh. Heavy crop of small sized, short necked tasty, sweet fruit.

KADOTA FIG (AVAILABLE POTTED ONLY) Large, light greenish-yellow 'white' skin, amber flesh. Long-lived, vigorous. Prune to any shape. Very sweet fruit needs hot weather to ripen. Fresh/dry/can. 100 hours. Self-fruitful.

LATTERULA FIG (AVAILABLE POTTED ONLY) Also known as Italian Honey Fig. Greenish yellow fruit; sweet, amber, honey colored flesh. Good for fresh eating, canning or drying. Ripens two crops in most years during July and Sept.

PETER'S HONEY FIG (AVAILABLE POTTED ONLY) Light yellow-green fruit with outstanding sweet, dark amber flesh. Originally from Sicily. Self-fruitful.

VIOLETTE de BORDEAUX SUBJECT TO AVAILABILITY (AVAILABLE POTTED ONLY) Large, almost black, fruit with a very deep red pulp. Produces two crops. Excellent fresh or dried. Good for container culture or small spaces.

SPECIAL ORDER FIGS

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they must be pre-ordered with us by November 8, 2010. All are available potted only.

CELESTIAL FIG (SPECIAL ORDER) Purplish-brown skin, pink flesh. Widely adapted. Two crops per year - early summer and late summer to early fall. Prune to any shape. 100 hours. Self-fruitful. *Must order by 11/8/10.*

CONADRIA FIG (SPECIAL ORDER) Light greenish-yellow skin, pink flesh. Not as sweet as Kadota, but resists spoilage. Fresh/dried. Very vigorous, long-lived tree. Heavy crops, coast or inland. 100 hours. Self-fruitful. *Must order by 11/8/10.*

EXCEL FIG (SPECIAL ORDER) Medium size, yellow fruit with amber pulp. Sweet, rich flavor. Resistant to splitting even under adverse conditions. Superb, all purpose fig. Very hardy. Zones 7-10. *Must order by 11/8/10.*

JANICE SEEDLESS FIG (SPECIAL ORDER) New "white" fig. Large, sweet, delicious, light greenish-yellow fruit with practically no seeds. Prolonged harvest, Aug through Nov. Suited to coastal and inland climates. Prune to any shape. 100 hours. Self-fruitful. *Must order by 11/8/10.*

OSBORNE PROLIFIC FIG (SPECIAL ORDER) Large fruit with very attractive purplish-brown skin, amber pulp. Especially pleasing flavor. Long-time favorite in cool coastal areas, excellent inland as well. Prune to any shape. 100 hours. Self-fruitful. *Must order by 11/8/10.*

PANACHE "TIGER" FIG (SPECIAL ORDER) Especially fine flavor! Small to medium sized fruit, green in color with yellow "tiger" stripes. Strawberry pulp is blood-red in color. 100 hours. Self-fruitful. *Must order by 11/8/10.*

FIG - NECTARINE

TEXAS BLUE GIANT FIG (SPECIAL ORDER) Extra large fig with purple skin and amber flesh, very sweet, ever-bearing habit. Zones 6-10. *Must order by 11/8/10.*

WHITE GENOA FIG (SPECIAL ORDER) Old variety, a favorite in cool coastal areas--also excellent inland. Greenish-yellow skin, amber flesh, distinctive flavor. Prune to any shape. 100 hours. Self-fruitful. *Must order by 11/8/10.*

JUJUBE

LANG JUJUBE Also called "Chinese Date". Pear-shaped fruits are reddish-brown, dry, wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy-to-grow tree: hardy, drought-resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Pollinated by Li.

LI JUJUBE Also called "Chinese Date". Round-shaped fruits are larger than Lang. Reddish-brown, dry and wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy-to-grow tree: hardy, drought-resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Partly self-fruitful, or pollinated by Lang.

SUGAR CANE JUJUBE - Extremely sweet and crunchy flesh, dark red-brown color when ripe. Ping-pong ball sized fruit. Partly self-fruitful or pollinated by Lang.

CONTORTED JUJUBE (SPECIAL ORDER) *Must order by 11/8/10.* Interesting ornamental form: twisted, contorted branching. Round-shaped, edible fruits, similar to Li. Early fall harvest. Easy-to-grow tree: hardy, drought-resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Partly self-fruitful or pollinated by Lang.

MULBERRY

PAKISTAN FRUITING MULBERRY Long (3"), firm, red to black, sweet syncarpous fruit (like a blackberry). Non-staining juice. Month-long early summer harvest. Used fresh and for pies, jams, and jellies. Large, vigorous, disease-resistant tree.

PERSIAN FRUITING MULBERRY Densely foliated tree to 25-30 ft. Large heart-shaped leaves. Large syncarpous fruit (like a blackberry) is juicy, dark red to black, good for jam.

TEAS WEEPING FRUITING MULBERRY Fast growing, heat-loving tree with blackberry-like fruit. Mature size approx. 12'x 16'. Very cold hardy.

WHITE FRUITING MULBERRY Medium-sized sweet white fruit shaped like blackberries. Grows at a moderate rate to 20-60' depending on soil quality and depth. Drought tolerant once established. Grows larger and more rapidly with irrigation.

NECTARINE

ARCTIC BLAZE WHITE NECTARINE Taste test winner. Low acid white nectarine with rich flavor and firm texture. Large size, red and creamy white skin. Mid to late August harvest. 700-800 hours. Self-fruitful.

ARCTIC JAY WHITE NECTARINE Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of sugar and acid. 800 hours. Self-fruitful.

CAVALIER Orange-yellow skin blushed with mottled dark red. Medium size, firm, aromatic, yellow freestone flesh resistant to brown rot. Ripens one week before Elberta peach. Hardy with showy blossoms. 700 to 800 hours. Self-fruitful.

DOUBLE DELIGHT NECTARINE Sensational fruit - consistently the best flavored yellow nectarine - plus magnificent, double pink flowers. Dark red-skinned freestone fruit is sweet with unusually rich flavor. Very high scoring in taste-tests. Heavy-bearing tree. Harvest in July in Central Cal. 400-500 hours. Self-fruitful.

FANTASIA NECTARINE Popular, large, yellow freestone. Early harvest fruit is firm, ripe, and tangy; late harvest is sweet with rich flavor. High scoring in taste tests. 500 hours. Self-fruitful.

HARKO NECTARINE Sweet, firm, yellow semi-freestone. Cold hardy with showy, large, single pink blossoms. Ripens with Redhaven Peach in early July. Tolerant of bacterial spot and brown rot. 800 hours. Self-fruitful.

HEAVENLY WHITE NECTARINE Very large, firm, white-fleshed freestone. Superb acid- sugar balance, and rich, complex flavor – connoisseur's delight. Dull red and cream-colored skin. Mid-July in Central Cal. 650 hours. Self-fruitful.

JUNEGLO NECTARINE Delicious, full-flavored early season fruit ripens late June in Central Cal. Semi-freestone when soft-ripe. Winter & frost hardy. 700 hours. Self-fruitful.

LIZ'S LATE NECTARINE Sprightly-sweet, intense, spicy flavor - the state of the art in fruit breeding. Late August /early Sept harvest in Central Cal. 600-700 hours. Self-fruitful.

SAUZEE KING FLAT NECTARINE – Sweet and juicy white flesh from donut shaped fruit. Heavy and early producer. Thinning is required for large fruit size. 500 hours.

SPECIAL ORDER NECTARINES

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they *must be pre-ordered with us by November 8, 2010*. Other sizes and root stocks are also available. Please ask a sales associate for more information.

DESERT DELIGHT NECTARINE (SPECIAL ORDER) Proven producer in warm winter climates, and highly recommended as an early season nectarine elsewhere. Large fruit with bright red skin, yellow flesh and delicious, rich, nectarine flavor. Harvest mid-June in Central Cal. 100-200 hours. Self-fruitful. *Must order by 11/8/10.*

FLAMEKIST NECTARINE (SPECIAL ORDER) High quality late season clingstone. Large, firm, red over yellow skin. Popular fresh market variety. Ripens late Aug/early Sept. in Central Cal. 700 hours. Self-fruitful. *Must order by 11/8/10.*

FLAVORTOP NECTARINE (SPECIAL ORDER) Firm, yellow free stone with excellent quality. Large, showy blossoms. Ripens mid-July. Susceptible to bacterial spot and tender to winter cold. 650 hours. Self-fruitful. *Must order by 11/8/10.*

GOLDMINE NECTARINE (SPECIAL ORDER) Long-time favorite in California. Small to medium size white-fleshed freestone. Aromatic, juicy, sweet. Ripe in August. 400 hours. Self-fruitful. *Must order by 11/8/10.*

HONEY KIST NECTARINE (SPECIAL ORDER) Subacid, high sugar, early-ripening yellow nectarine - Harvest late June in Central Cal. (Begin picking before fruit starts to soften; the subacid varieties are good to eat before they are fully ripe.) 1,000 hours. Self-fruitful. *Must order by 11/8/10.*

INDEPENDENCE NECTARINE (SPECIAL ORDER) Bright red skin, firm yellow freestone. Rich flavor, tangy and sweet, one of the best. Winter & frost hardy, very reliable producer. Early July harvest in Central Cal. 700 hours. Self-fruitful. *Must order by 11/8/10.*

JOLLY RED GIANT NECTARINE (SPECIAL ORDER) Very large fruit to 3 1/2" or more if properly thinned. Freestone, delicious flavor. Skin bright orange-red over yellow. Mid-July harvest. 600 hours. Self-fruitful. *Must order by 11/8/10.*

LATE LEGRAND NECTARINE (SPECIAL ORDER) Old favorite yellow-fleshed nectarine. Richly flavored, still one of the best. Harvest mid to late August. 600 hours. Self-fruitful. *Must order by 11/8/10.*

MERICREST NECTARINE (SPECIAL ORDER) Very cold hardy, frost hardy, late bloomer. Crops after sub-zero winters. Large, red-skinned yellow freestone, rich tangy flavor. Highly recommended. Mid-July harvest in Central Cal. 800 hours. Self-fruitful. *Must order by 11/8/10.*

PANAMINT NECTARINE (SPECIAL ORDER) Attractive red-skinned yellow freestone. Aromatic, intensely flavored, nice acid-sugar balance. Dependable, long-time favorite in warm winter So Cal climates. Late July/early August. 250 hours. Self-fruitful. *Must order by 11/8/10.*

SNOW QUEEN NECTARINE (SPECIAL ORDER) Sweet, juicy, early season white freestone. Late June harvest in Central Cal. 250-300 hours. Self-fruitful. *Must order by 11/8/10.*

ZEE GLO NECTARINE (SPECIAL ORDER) Taste test winner. Delicious late summer fruit with classic, zesty, nectarine flavor. Superb balance of acid and sugar. Attractive, dark red skin. Harvest mid to late August in Central Cal. 6-700 hours. Self-fruitful. *Must order by 11/8/10.*

PEACH

ARCTIC SUPREME WHITE PEACH Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central Cal. 700 hours. Self-fruitful.

DONUT (Stark Saturn) WHITE PEACH Also called Saucer or Peento Peach. Unique white-fleshed fruit with a sunken center (shaped like a doughnut). Sweet, with a mild flavor described by some as almond-like. Ripens late June/early July in Central Cal. 400-500 hours. Self-fruitful.

DOUBLE JEWEL PEACH Flowering/fruiting peach for home orchard and landscape. Profuse, showy, double pink flowers. Late blooming, but early harvest – late June in Central Cal. Large, richly flavored, yellow freestone. Self-fruitful.

ELBERTA PEACH Famous yellow freestone. Classic, rich, peach flavor: high scoring in taste tests. Use fresh, canned, cooked. Ripe late July/early Aug in Central Cal, up to 3-4 weeks later in colder climates. 800 hours. Self-fruitful.

FAIRTIME PEACH Fine fruit for the very late season. Very large yellow freestone, excellent flavor. Mid-Sept in Central Cal. Early bloom. 650 hours. Self-fruitful.

FANTASTIC ELBERTA PEACH Beautiful pink double blossoms. Large yellow freestone fruit is flavorful, firm, sweet, highest quality. All-purpose: fresh/can/freeze/dry. Ripens August 1st in Central Cal. 700 hours. Self-fruitful.

FROST PEACH Resistant to peach leaf curl (10-year trials at Washington State U.). Delicious yellow freestone. Slight red blush over greenish yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July harvest. Showy pink bloom in spring. 700 hours. Self-fruitful.

GIANT BABCOCK WHITE PEACH From a cross of Babcock and July (Kim) Elberta. Large, red-skinned, white-fleshed freestone. Sweet, aromatic, very similar to Babcock. Excellent dessert quality. 500 hours. Self-fruitful.

INDIAN BLOOD CLING PEACH Large, late-season canning peach. Red-skinned, red flesh, rich flavor. Blooms late, sets heavy crops. 800 hours. Self-fruitful.

INDIAN FREE PEACH Taste test winner at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinate.

J. H. HALE PEACH Old variety, still one of the best. Very large, firm, superb flavor. Fresh/canned. Ripens August 1st in Central Calif. Excellent frost hardiness. 800 hours. Another peach or nectarine needed to pollinate.

JULY (KIM) ELBERTA PEACH Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 500 hours. Self-fruitful.

LEMON ELBERTA EZ-PICK PEACH Also called Early Elberta. Same characteristics as July Elberta above; EZ-Pick trees have been consistently pruned to stay a small size with low branching. They are approximately 21" tall with branching above 15." Must continue to prune to maintain smaller size.

LORING PEACH Taste test winner. Superb large yellow freestone. Excellent flavor and texture, low acid. Harvests over 2-3 week period, mid to late July in Central Cal. Requires little or no thinning. Excellent for home orchard. 750 hours. Self-fruitful.

O'HENRY PEACH Popular fresh market yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-Aug in Central Cal. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

Q-1-8 PEACH White-fleshed, semi-freestone fruit is sweet and juicy. Peach leaf curl resistant with showy blossoms. 700-800 hours. Self-fruitful.

REDHAVEN PEACH World's most widely planted peach. High quality yellow freestone. Ripens early July in Central Cal. Frost hardy. Fresh/freeze. 800 hours. Self-fruitful.

RELIANCE PEACH Extremely hardy peach with a dull red blush over yellow skin and yellow flesh. Good flavor and very productive. Beautiful late bloom. 750-800 hours. Self-fruitful.

RIO OSO GEM PEACH Favorite late yellow freestone. Large, sweet, rich flavor, like J.H. Hale. Fresh/freeze. Small tree. Showy bloom. Mid-August in Central Cal. 800 hours. Self-fruitful.

SNOW BEAUTY WHITE PEACH Low acid, high sugar, tantalizing flavor. Large, very firm, red skin. Taste test winner. Mid-July harvest in Central Cal. 750-850 hours. Self-fruitful.

WHITE LADY WHITE PEACH Among the best of the new, low acid/high sugar white peaches - a farmer's market favorite. Most cold-hardy white peach. Red-skinned fruits are medium to large, very firm, freestone. 800 hours. Self-fruitful.

MULTI-BUDDED 3-N-1 PEACH: LEAF CURL RESISTANT

PEAR

BARTLETT PEAR World's most popular pear. Early mid-season, about August 1st. High quality, tolerates hot summers. 800 hours. Self-fruitful in most climates of the western U.S. Elsewhere pollinated by Bosc, D'Anjou, Winter Nelis.

BLAKE'S PRIDE PEAR New pear variety. A distinct blend of sugar and acid give it a rich, aromatic taste. The skin is yellow and light golden in color. Fruit is excellent eating quality, and the tree is fire blight resistant. Ripens mid-August.

BOSC PEAR Long & narrow shape, brown skin. Superb quality, one of the best. Harvest late October. Fresh/cooked. Susceptible to fireblight in warm, moist climates. 800 hours. Pollinated by Bartlett or other pear.

COMICE PEAR The gift pack pear. Sweet, aromatic, fine texture, superb flavor & quality - one of the best. Short neck, greenish-yellow skin with red blush. Mid-Sept harvest. 600 hours. Self-fruitful in most of western U.S., or plant with Bartlett.

D'ANJOU PEAR Large, short-necked, firm, good quality, keeps well. Harvest September 1st, one month after the Bartlett in Central Cal. 800 hours. Pollinated by Bartlett.

HARROW'S DELIGHT PEAR Fire-blight resistant, with fruit similar to Bartlett. Yellow skin with attractive red blush. Smooth, fine flesh is especially flavorful. Ripens mid-July. 800 hours. Interfruitful with Bartlett, Bosc, D'Anjou, and Moonglow.

MOONGLOW PEAR Fire-blight resistant. Large fruit for fresh use or canning. 700 hours. Pollenizer required; good pollenizer for other pears.

RED D'ANJOU PEAR Large, short-necked, firm fruit. Strong full red color is very even. Fruit stores well and has a smooth texture. 800 hours. Pollinated by Bartlett.

WARREN PEAR Excellent quality dessert pear and highly resistant to fire blight. Med. to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Harvest mid-August. Cold hardy to -20 deg. 600 hours. Self-fruitful.

MULTI-BUDDED PEARS

3-N-1 PEAR (Disease resistant)

6-N-1 ESPALIERED PEAR

ASIAN PEAR

20TH CENTURY ASIAN PEAR (Nijisseiki, apple pear) Juicy, sweet, mild-flavored fruit is crisp like an apple. Early to mid-Aug harvest in Central Cal. Keeps well. Easy to grow, heavy bearing small tree. 450 hours. Self-fruitful, or pollinated by Shinseiki, Bartlett, or other.

HOSUI ASIAN PEAR Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-Aug in Central Cal. 450 hours. Pollinated by Shinko, Chojuro, Bartlett, or 20th Century.

SHINSEIKI ASIAN PEAR Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early Aug in Central Cal. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 350-450 hours. Self-fruitful.

MULTI-BUDDED ASIAN PEARS: 3-N-1

SPECIAL ORDER PEARS & ASIAN PEARS

PERSIMMON

FUYU PERSIMMON – JIRO (AVAILABLE POTTED ONLY) ("Apple Persimmon") Medium size, flat shape, still hard when ripe, non- astringent. Cool or hot climate. Hardy, attractive, tree practically pest free. 200 hours. Self-fruitful.

HACHIYA PERSIMMON (AVAILABLE POTTED ONLY) Large, deep orange-red, acorn shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft-ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental. 200 hours. Self-fruitful.

PLUM

BEAUTY PLUM Sweet, flavorful plum, more widely adapted than Santa Rosa (more productive in cool, rainy climates). Red over yellow skin, amber flesh streaked red. Ripens June in Central Cal. 250 hours. Self-fruitful.

BURGUNDY PLUM Maroon-colored skin and flesh. Sweet with little or no tartness and a very pleasing, mild flavor. High taste test scores. Harvest mid-July to mid-Aug in Central Cal. Very productive. Narrow, upright habit. 400 hours. Self-fruitful.

CATALINA Large, black, favorite fresh market plum. Sweet when fully ripe, with very little tartness at skin and pit. Vigorous, productive tree. 400 hours. Self-fruitful.

ELEPHANT HEART PLUM Home-orchard favorite – large, heart-shaped fruit with sweet, juicy, rich flavor, firm red flesh. Dark reddish-purple mottled skin. Long harvest season -Sept in Central Cal. Hardy, heavy-bearing. 500 hours. Pollinate with Beauty or Santa Rosa.

EMERALD BEAUT PLUM One of the highest-rated plums in tastings at Dave Wilson Nursery. Light green skin, yellow to orange freestone flesh. Harvest begins late Aug. in Central Cal. Ripe fruit continues to sweeten, becomes exceptionally sweet, but remains crisp and crunchy. 600-700 hours. Pollenizer required: Beauty, Burgundy, Late Santa Rosa, Flavor King Pluot.

NUBIANA Purplish-black skin, amber flesh. Large, firm, flattened shape. Sweet, flavorful, very little tartness at skin or pit. Favorite fresh market fruit, excellent for home orchard. 400 hours. Self-fruitful.

SANTA ROSA PLUM Most popular plum in California. Juicy, tangy, flavorful. Reddish-purple skin, amber flesh tinged red. Late June in Central Cal. 300 hours. Self-fruitful.

SATSUMA PLUM Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollinated by Santa Rosa or Beauty.

WEeping SANTA ROSA SEMI DWARF PLUM One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit - long limbs bow gracefully to ground. Easily espaliered. 400 hours. Self-fruitful.

SUPERIOR PLUM This Japanese-American hybrid has large, firm delicious fruit. Bears earlier and heavier than most plum trees. Ripens August-September.

SPECIAL ORDER PLUMS

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they must be pre-ordered with us by November 8, 2010. Other sizes and root stocks are also available. Please ask a sales associate for more information.

BURBANK PLUM (SPECIAL ORDER) Red and golden yellow skin. Yellow-orange (apricot colored) flesh is firm, sweet, aromatic, juicy and uniquely flavored. Relatively small tree, cold hardy. 400 hours. Pollinated by Santa Rosa. *Must order by 11/8/10.*

FORTUNE PLUM (SPECIAL ORDER) Large, attractive fruit with bright red and yellow skin. Firm, flavorful, semi-freestone yellow flesh, very nice dessert quality. Harvest mid-Aug in Central Cal. 500 hours. Pollenizer required: Santa Rosa or Late Santa Rosa. *Must order by 11/8/10.*

FRIAR PLUM (SPECIAL ORDER) Large, round, black skin, amber flesh. Harvest is prolonged-fruit is hard-ripe but sweetest and most delicious several weeks later (mid/late Aug. in Central Cal). 400 hours. Self-fruitful or plant with Santa Rosa. *Must order by 11/8/10.*

GOLDEN NECTAR PLUM (SPECIAL ORDER) Popular yellow dessert plum. Large, oblong fruit with waxy, thin, amber skin. Amber flesh is firm, sweet & flavorful. Very small pit. Aug. harvest in Central Cal. 500 hours. Self-fruitful. *Must order by 11/8/10.*

HOWARD MIRACLE PLUM (SPECIAL ORDER) Large, firm, juicy, freestone, with distinctive flavor. Amber flesh; yellow skin blushed with red. 400 hours. Pollenizer required: another Japanese plum such as Beauty or Santa Rosa. *Must order by 11/8/10.*

KELSEY PLUM (SPECIAL ORDER) Large, firm, aromatic, rich flavor, keeps well. Low acid. Heart shaped, greenish-yellow thin skin, red blush. Small pit, freestone when ripe. Vigorous, heavy bearing. 400 hours. Pollinated by Santa Rosa, Beauty, or Wickson. *Must order by 11/8/10.*

LARODA PLUM (SPECIAL ORDER) Dark purple fruit similar to Santa Rosa, but larger. Excellent flavor, juicy, one of the best. Prolonged harvest: mid-July to mid-Aug. 400 hours. Pollenizer required: Santa Rosa, Catalina, or Nubiana. *Must order by 11/8/10.*

LATE SANTA ROSA PLUM (SPECIAL ORDER) Medium to large reddish-purple skin, amber flesh. Tart-sweet with rich flavor when fully ripe. Ripe about one month after Santa Rosa. 500 hours. Self-fruitful. *Must order by 11/8/10.*

MARIPOSA PLUM (Improved Satsuma) (SPECIAL ORDER) Large, red-fleshed, sweet, juicy, firm, delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Harvest Aug. 250 hours. Pollinated by Beauty, Nubiana, or Santa Rosa. *Must order by 11/8/10.*

METHLEY PLUM (SPECIAL ORDER) Juicy, sweet, red flesh, mild flavor. Reddish-purple skin. Harvest in June in Central Cal. Attractive tree, heavy bearing and vigorous. 250 hours or less. Self-fruitful. *Must order by 11/8/10.*

SHIRO PLUM (SPECIAL ORDER) Medium size greenish-yellow fruit is juicy, moderately sweet with a pleasing mild flavor. Bears reliably in many climates. Late June/early July in Central Cal. 600 hours. Self-fruitful. *Must order by 11/8/10.*

WICKSON PLUM (SPECIAL ORDER) Large, heart-shaped greenish-yellow fruit. Very sweet, translucent flesh. Little or no tartness at skin or pit. Mid-season harvest. Partly self-fruitful, or pollinated by Kelsey or Santa Rosa. 500 hours. *Must order by 11/8/10.*

BLUE DAMSON PLUM (SPECIAL ORDER) Very old variety, rugged and dependable. Small, blue-black tart plums for jams & jellies. Late blooming, cold hardy, heavy bearing. 800 hours. Self-fruitful. *Must order by 11/8/10.*

BROOKS PLUM (SPECIAL ORDER) Oval-shaped fruit with purplish-black skin and yellow flesh. Larger and sweeter than Italian. Used fresh and for canning and drying. 800 hours. Self-fruitful. *Must order by 11/8/10.*

GREEN GAGE PLUM (SPECIAL ORDER) European plum. Long-time favorite for dessert, cooking, canning. Tender, juicy, rich flavor. Ripens late summer. Relatively small tree. 500 hours. Self-fruitful. *Must order by 11/8/10.*

SENECA PLUM (SPECIAL ORDER) Large reddish-purple fruit with very sweet, crisp, yellow freestone flesh. Resists brown rot and cracking. Used fresh, for canning and drying. Vigorous, productive, upright tree. Successful in many climates. 800 hours. Pollenizer required. *Must order by 11/8/10.*

PLUOTS – See HYBRIDS (next page)

POMEGRANATE

AMBROSIA POMEGRANATE *POTTED ONLY* Fantastically huge fruit: up to 3 times the size of Wonderful. Pale pink skin, purple sweet-tart juice, similar to Wonderful. Long-lived, any soil, inland or coastal climate. 150 hours. Self-fruitful.

ANGEL RED POMEGRANATE Fruit is a beautiful red color and soft seeded. Produces 30 days earlier than Wonderful. Heavy bearing with uniform size and color.

EVERSWEET POMEGRANATE *POTTED ONLY* Very sweet, virtually seedless fruit. Red skin, clear juice. Harvest late summer through fall. Large, showy, orange-red flowers. 150 hours. Self-fruitful.

GARNET SASH POMEGRANATE *POTTED ONLY* Vigorous tree sets big crop of large, dark red fruit with deep-red, partially edible sweet, tart seeds. Eat fresh or use in cooking. 150-200 hours. Self-fruitful.

PINK SATIN POMEGRANATE *POTTED ONLY* Medium to large fruit, pink to red fruit. Refreshing flavor, with edible seeds. 150-200 hours. Self-fruitful.

RED SILK POMEGRANATE *POTTED ONLY* Medium to large fruit with edible seeds that have sweet berry flavor. Semi-dwarf tree sets large crops. Eat fresh or use in cooking. 150-200 hours. Self-fruitful.

SHARP VELVET POMEGRANATE *POTTED ONLY* Large sized pomegranate with dark red fruit. Fine flavor, very tart. Eat fresh or use in cooking. 150-200 hours. Self-fruitful.

SWEET POMEGRANATE *POTTED ONLY* Sweeter fruit than Wonderful, more widely adapted. Small, glossy-leaved, ornamental tree with showy orange-red blossoms in late spring. Very suitable to espalier and container growing. Harvest late summer. Unsplit ripe fruit stores in cool dry place for 2 months or more. About 100 hours. Self-fruitful.

WONDERFUL POMEGRANATE *POTTED ONLY* Large, purple-red fruit with a delicious, tangy flavor. Best quality in hot inland climate. Bright red-orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

SPECIAL ORDER POMEGRANATES

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they *must be pre-ordered with us by November 8, 2010.* Please ask a sales associate for more information.

GRENADA POMEGRANATE (SPECIAL ORDER) A true grenadine selection. Fruit is dark, burgundy-red all over. Seeds and juice are dark red, with good flavor. Ripens well coastal & inland. *Must order by 11/8/10.*

KASHMIR POMEGRANATE (SPECIAL ORDER) Med size pomegranate with light pink-red exterior. Ruby red seeds have intense flavor with no overbearing acidic taste. Slightly spreading growth habit, can also be grown as a tree. Keep any height with summer pruning. Eat fresh or use in cooking. 150-200 hours. Self fruitful. *Must order by 11/8/10.*

PRUNE

EARLY ITALIAN PRUNE (Richard's) Similar to the Italian, but sweeter, slightly larger, and more productive. Shorter growing season requirement than the Italian (ripens 2-3 weeks earlier). 800 hours. Self-fruitful.

FRENCH IMPROVED PRUNE California's commercial prune. Reddish-purple skin, dark amber flesh. Very sweet, high quality fruit. Dessert/canned/dry. 800 hours. Self-fruitful.

SPECIAL ORDER PRUNES

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they *must be pre-ordered with us by November 8, 2010.* Please ask a sales associate for more information.

ITALIAN PRUNE (SPECIAL ORDER) Large, purple skin, free stone. Rich flavor, very sweet when ripe – fresh, dried, or canned. Vigorous, cold hardy tree. Late bloom. 800 hours. Self-fruitful. *Must order by 11/8/10.*

PLUM, POMEGRANATE, PRUNE

STANLEY PRUNE (SPECIAL ORDER) Large, dark blue skin. Juicy, sweet, delicious, greenish-yellow meaty flesh, freestone. Late summer harvest. Late blooming, extremely cold hardy and reliable. 800 hours. Self-fruitful. *Must order by 11/8/10.*

SUGAR PRUNE (SPECIAL ORDER) Reddish-purple skin, greenish-yellow flesh, very sweet. Used fresh and for canning. 550 hours. Self-fruitful. *Must order by 11/8/10.*

QUINCE

PINEAPPLE QUINCE Heavy crops of large, tart fruit used in baking, jams, and jellies. Profuse, ornamental bloom. 300 hours. Self-fruitful.

ORANGE QUINCE (SPECIAL ORDER) *Must order by 11/8/10.* Large, round, bright yellow fruits often exceed 1lb. Flavorful, aromatic, excellent for cooking. Early harvest. 300 hours. Self-fruitful.

SMYRNA QUINCE (SPECIAL ORDER) *Must order by 11/8/10.* Extremely large fruit-light yellow flesh, bright yellow skin. Attractive tree (or multi-stemmed shrub) has dark green foliage, very showy bloom. Tolerates wet soil. 300 hours. Self-fruitful.

FRUIT SALAD

MULTI-BUDDED FRUIT SALAD COMBOS

HYBRIDS

COT-N-CANDY APRIUM Apricot-plum hybrid. Resembles an apricot, but with a distinctive flavor and texture all its own. White flesh is extra sweet and juicy with a plum aftertaste. Ripens one week later than Flavor Delight. Self-fruitful.

FLAVOR DELIGHT APRIUM INTERSPECIFIC Apricot-plum hybrid. Resembles an apricot, but with a distinctive flavor and texture all its own. High taste-test scores – one of the most flavorful early season fruits. Early June harvest. Less than 300 hours. Self-fruitful, but biggest crops if pollinated by any apricot.

SPICE ZEE NECTAPLUM Nectarine and plum cross. Fruit is slightly acidic and full of sugar giving it a spicy sweet flavor; both plum and nectarine traits are easily detectable. Attractive red leaves. Self-fruitful and very productive variety.

TRI-LITE PEACHxPLUM This white-fleshed peach/plum hybrid can be eaten firm. It has a mild, classic flavor with a wonderful plum aftertaste that makes this a unique treat. Early ripening in June.

NEW BELLA GOLD PEACOTUM Peach x Apricot x Plum cross. New fruit type with wonderful flavor. Ripens early July. 500 hours. Pollinated by Flavor Grenade Pluot.

DAPPLE DANDY PLUOT INTERSPECIFIC Dependable setter and taste test winner, great plum-apricot flavor. Ripe skin is maroon w/ yellow dapple. August harvest in Central Calif. 400-500 hours. Pollenized by Flavor Supreme pluot, Santa Rosa or Burgundy plum.

EMERALD DROP PLUOT Med to large in size. Green skin and a yellow-orange flesh. Prolonged harvest. Upright tree, sets heavy crops once established. Harvest mid-July to late-August. 400 hours. Pollinated by Santa Rosa plum, or other pluot.

FLAVOR FINALE PLUOT Light fleshed fruit with dark skin. Wonderful late season pluot with long hang time. Harvest begins late Aug. and fruit is edible well into Oct. Upright tree sets large crops. 500 hours. Pollenizer required.

FLAVOR GRENADE PLUOT Elongated green fruit with a red blush. Crisp texture and explosive flavor. Taste-test winner. Hangs on the tree for 4 to 6 weeks. Pollenize with a Japanese plum. 400 to 500 hours.

FLAVOR KING PLUOT INTERSPECIFIC Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central Calif. Naturally small tree. 400-500 hours. Pollinated by Flavor Supreme, Santa Rosa, or Late Santa Rosa.

FLAVOR QUEEN PLUOT INTERSPECIFIC Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, orange flesh. Prolonged harvest: mid-July thru August. 4-500 hours. Pollenized by early blooming Pluot or Burgundy Plum.

FLAVOR SUPREME PLUOT INTERSPECIFIC Taste test winner. Plum-apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central Cal, about 2 weeks before Santa Rosa. 700-800 hours. Pollinated by Santa Rosa, Late Santa Rosa, or other Pluot.

MULTI-BUDDED PLUOT: 4-N-1

PRICE ALMOND (SPECIAL ORDER) Excellent pollenizer for Nonpareil. Blooms and harvests same time as Nonpareil, nut is very similar. Small, heavy bearing tree. 400 hours. Pollenizer required. *Must order by 11/8/10.*

CHESTNUT

COLOSSAL CHESTNUT Thought to be a hybrid of the Asian and European chestnuts. High quality medium to large sized nuts fall easily from the hull, are easy to peel. Large, long-lived, spreading tree. 400-500 hours. Pollinated by Colossal or Nevada seedling.

NEVADA CHESTNUT Pollenizer for the Colossal - also a good producer. One Nevada pollinates 8-10 Colossal trees. Not tolerant of alkaline soil. 500 hours. Pollinated by Colossal.

PECAN

MOHAWK PECAN (AVAILABLE POTTED ONLY) Very large, thin-shelled nut, excellent quality. Earliest maturing, so more widely adapted than others. Attractive tree is vigorous, bears young and heavy. Good choice for home planting. 250 hours. Self-fruitful.

WESTERN SCHLEY PECAN (AVAILABLE POTTED ONLY) Easy to grow, hardy tree. Less fussy about soil & nutrition. Long, tapered, medium-sized thin-shelled nuts. Fine quality, mid-season. 250 hours. Self-fruitful.

PISTACHIO

KERMAN FEMALE PISTACHIO (AVAILABLE POTTED ONLY) Long hot summers required to ripen. Do not disturb root ball when handling and planting. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollinated by Peters.

PETERS MALE PISTACHIO (AVAILABLE POTTED ONLY) Pollenizer for Kerman. Does not bear fruit. One Peters pollinates up to eleven females (Kerman). Do not disturb root ball when handling and planting. Drought-resistant once established. 800 hours.

WALNUT

All Walnuts are on No. Calif. Black Walnut
AMBASSADOR (CARPATHIAN) WALNUT From Idaho, cold hardy for severe climates. 1.25" nuts, thin shell, well sealed. Plump, light-colored kernels, excellent flavor. Young trees set heavy crops. 600 hours. Self-fruitful.

CHANDLER WALNUT Developed by UC Davis. Heavy bearing, high quality light-colored nuts. Good choice for backyard tree. Fall harvest. 700 hours. Self-fruitful.

FRANQUETTE WALNUT Last English walnut to leaf out, less susceptible to spring frost damage. Very large tree, excellent for shade. Fair production of well sealed, thin-shelled, high quality nuts. Pollenizer for Hartley. 700 hours. Self-fruitful.

HARTLEY WALNUT Long-time no. 1 walnut in California for its quality and dependability. Large, thin-shelled, well sealed nut. Light colored flavorful kernel. 700 hours. Self-fruitful.

IDAHO WALNUT Very large, sweet, excellent eating nut, good quality. Extremely hardy variety withstands extreme cold. Vigorous growth. 300-700 hours. Self-fruitful.

NORTHERN CALIFORNIA BLACK WALNUT Medium sized nut tree, a native. Heavy bearing. Great shade tree too. Self-fruitful.

GRAPES

WINE

CABERNET SAUVIGNON Late season red wine grape, small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful.

CHARDONNAY GRAPE For white wines. Small round berry. Best quality where summers are cool. Vigorous vine, very cold hardy. 100 hours. Self-fruitful.

MERLOT GRAPE Black berry, used for distinctive red wines. Best quality in cooler regions. 100 hours. Self-fruitful.

PINOT NOIR GRAPE Small black berries that yield the famous French Burgundy wines. Requires cool summers, cane pruning. Early harvest. 100 hours. Self-fruitful.

TABLE

BLACK MONUKKA SEEDLESS GRAPE Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Fresh or raisins. Early mid-season. 100 hours. Self-fruitful.

NEW BLUEBERRY SEEDLESS GRAPE Purple-blue, medium-sized fruit with a hint of blueberry flavor. Fresh or raisins. Mid-season. 100 hours. Self-fruitful.

NEW CANADICE SEEDLESS GRAPE Red, very sweet, medium-sized fruit. For fresh use or raisins. Ripens in August. . 100 hours. Self-fruitful.

CONCORD EASTERN SEEDED GRAPE Medium blue-black berry. Excellent, strong flavor. Used as a table grape, jelly, and for juice.

CONCORD SEEDLESS GRAPE American grape, a sport Concord. Berries very similar to Concord, but seedless (or seeds very rare). Bluish-black skin, green flesh, distinctive Concord flavor. 100 hours. Self-fruitful.

FLAME SEEDLESS GRAPE Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens early, before Thompson. Vigorous. 100 hours. Self-fruitful.

GOLDEN MUSCAT GRAPE Large, egg-shaped berries are pale golden yellow when ripe. Characteristic European Muscat flavor and aroma. 100 hours. Self-fruitful.

HIMROD GRAPE Hybrid of Thompson seedless. Highest quality pale green berries. Early harvest. 100 hours. Self-fruitful.

PERLETTE SEEDLESS GRAPE Pale green berry is crisp and juicy. Larger than Thompson and 2 weeks earlier. Requires less summer heat than Thompson to ripen. 100 hours. Self-fruitful.

SUFFOLK RED SEEDLESS GRAPE Russian seedless X American. Hardier than European grapes, less heat to ripen. Largest berries of the hybrids. Early, excellent quality. 100 hours. Self-fruitful.

THOMPSON SEEDLESS GRAPE Most popular grape in Calif. & Arizona. Fresh & raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful.

BERRIES

BLUEBERRIES

BLUECROP BLUEBERRY No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, flavorful fruit doesn't drop or crack. Tolerates hot summers if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

BLUERAY BLUEBERRY Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. Blueberry culture requires soil that is moist, acidic, and high in humus. 800 hours. Self-fruitful. Ripens early to mid-season.

NEW CHANDLER BLUEBERRY Extremely large fruit (almost the size of a cherry). Mid to late season harvest, will continue producing over a six week period.

NEW HARDYBLUE BLUEBERRY Dark blue, medium-sized sweet berries. Heavy yields. Adaptable to clay soil. Self-fruitful, but plant two varieties for biggest crops.

JUBILEE BLUEBERRY Midseason. Jubilee bushes are upright and quite compact, with fruit borne on the outer periphery of the bush. 500-700 hours.

MISTY BLUEBERRY Southern Highbush (low chill requirement, tolerates heat). Excellent flavor, early harvest. Does well in inland heat. Blueberry culture requires soil that is moist, acidic, and high in humus.

NEW PATRIOT BLUEBERRY Cold-hardy, early season blueberry with consistent crops. Low-growing, adaptable to many soil types.

O'NEAL BLUEBERRY Southern Highbush (low chill requirement, tolerates heat). Large fruit is especially sweet and flavorful. Early season. Soil must be high in humus. 5-6 ft. bush. 200 hours. Self-fruitful, but plant 2 varieties for biggest crops.

REVELLE BLUEBERRY Midseason. This berry has a pleasing crunchy texture and excellent flavor. 600-800 hours. Self-fruitful, but plant 2 varieties for biggest crops.

SOUTH MOON BLUEBERRY Early season. Southern Highbush variety, vigorous grower. Soil must be high in humus. Chilling requirement is 500 hours. Self-fruitful, but plant 2 varieties for biggest crops.

CURRENTS

Variety to be determined.

BLACKBERRIES

APACHE (Thornless) Very large fruit on vigorous erect canes with good yields and fruit quality. Grows well in hot summer climates. Ripens mid-June.

BLACK BUTTE "World's Largest" blackberry, 1" in diameter by 2" long, almost twice the size of other blackberries. Grows on trailing canes, best in areas that stay above 10 degrees. Has firmer fruit that is suitable for fresh eating. Ripens late June.

CHESTER (Thornless) Large fruit with very good flavor. Sweet, high quality, and firm. Will not soften, leak, or lose color in hot weather. Late season producer with a very long production season.

DIRKSEN (Thornless) Large black fruit with excellent quality and flavor, and high sugar content. Resistant to anthracnose. Ripens early July.

MARION Medium to large. Fruit is bright red, firm, very flavorful. Produced on vigorous, trailing canes. Suitable for home freezing and canning. Leading variety in Pacific Northwest. Ripens mid-July to mid-August.

NATCHEZ (Thornless) Large black fruit on semi-erect canes with high yields. Grows well in hot summer climates. Ripens mid-June.

OLALLIE Large (1½" long, ¾" thick) shiny black, firm berry. Sweeter and less tart than others. Vigorous grower, very productive. Hardy to 10 degrees F. Low chill requirement. Commercially planted in California for market. Ripens late May to early July.

BOYSENBERRIES

BOYSENBERRY (Thornless) Medium reddish-black berry. A less vigorous grower with lower fruit yields compared to Regular Boysenberry. Good for mild winter areas. Popular with home owners because its thornless. Ripens in June.

BOYSENBERRY (Regular) Large (1.5" long, 1" thick) non-shiny reddish-black colored berry. Soft, very juicy, sweet-tart berry. Good for canning, freezing, and eating fresh. Ripens in June.

LOGANBERRY (Thornless) Medium-large (1 ¼" long, ¾" thick). Lavender-red berry. Does not darken while ripening. Soft, tart, or sour fruit because of high acidity. Excellent for pies, juice, canning and wine making. Ripens in June.

RASPBERRIES

AMITY (Red, Everbearing) Large, medium red, good quality berry. Stem does not come free until ripe. Medium plant growth, nearly thornless.

CANBY (Red) Medium to large. Light red berry. Firm, sweet, and excellent for fresh use or freezing. Vigorous canes. Moderate winter hardiness. Likes cooler summers. Nearly thornless. High level of virus & aphid immunity. Ripens June.

CUMBERLAND BLACK (Black) Medium-large, blue-black berry. Good fresh or jams and jellies. Good in cold areas. Very hardy.

FALL GOLD Very sweet, yellow, large, juicy, and firm. Very winter hardy. Vigorous. Ripens July-August, and fall.

HERITAGE (Red, Everbearing) Large, very firm, excellent quality. Moderate early July crop and heavy production of quality early September fruit. An everbearing variety with good vigor, hardy canes which do not need staking. The No. 1 Fall variety nationwide.

INDIAN SUMMER (Red, Everbearing) Medium-large, dark red berry. Rather soft, very tasty, everbearing. Produces small crop in late spring and larger crop in fall. Well-adapted for heavy soils. Good for canning, freezing, preserves, and jams. Ripens May and September.

SEPTEMBER (Red, Everbearing) Medium. Rose-red color, good tart flavor, good quality. Vigorous, hardy, productive plants. Mosaic resistant. Good choice for cold climates. Bears light crops in June and a heavy crop in September.

WILLIAMETTE (Red) Large, dark red, medium acid. Heavy producer. Excellent for shipping. Old standard and once most widely planted in the world. Newer varieties give higher yields. Ripens in June.

STRAWBERRIES

CHANDLER STRAWBERRY (June bearing) Very large, medium red, glossy, attractive finish. Long conical to long wedge shaped. High yielding. Excellent quality fruit, much firmer than Douglas. Excellent coastal variety. Adapted to winter and summer plantings.

SEQUOIA STRAWBERRY (Everbearing) Very large. Medium red color, not good for shipping but great for home owner. The sweetest, best tasting strawberry, and the most popular. #1 recommended variety for back yard use. Blooms 10 weeks after planting.

SMALL VEGGIES & FRUIT

JERUSALEM ARTICHOKE Perennial. Produces edible tubers which are good in salads, boiled, or in soups. Plants good for landscaping, making a high hedge in one season. Ripens fall.

ASPARAGUS (U.C. 157) Perennial vegetable. Plants take 2-3 years to come into full production, then furnish delicious spears every spring for 10-15 years. Tall, feathery, graceful, highly ornamental plants. U.C. 157 produces earlier, is more uniform in color and size, more productive than other varieties.

HORSERADISH Large, coarse herb cultivated for its roots as a relish. Harvest roots in winter or spring. Mature plant is 3'x 5'.

VICTORIA CHERRY RHUBARB (Seedlings) Vigorous, deep red, heavy thick stalks. Tart flavored, succulent. Great for pies, sauces, and canning. Perennial. Some variation in coloring will be seen from plant to plant.

ORNAMENTAL TREES

AUTUMN BLAZE MAPLE *Acer x freemanii* 'Autumn Blaze' Dense, oval shaped canopy, green foliage. Fall color is brilliant orange-red. Reaches 50' x 40'. Sunset zones 1-9, 14-24.

OCTOBER GLORY MAPLE *Acer rubrum* 'October Glory' Nearly round canopy, glossy green foliage. Better suited to mild winter and hot summer climates than other maples. Showy red fall color. Ample soil moisture required. Reaches 40'x 35'. Sunset zones 1-9, 14-24.

RED SUNSET MAPLE *Acer rubrum* 'Red Sunset' Upright growth to 40'. Oval shaped canopy, glossy dark green leaves, bright red or orange-red fall color. Ample soil moisture required. Sunset zones 1-9, 14-17.

CANDIED APPLE WEeping FLOWERING CRABAPPLE *Malus* 'Candied Apple Weeping' Small tree, weeping form, 15' x 15'. New foliage reddish, aging to dark green. Flowers large, purplish pink. Small fruits are brilliant red. Excellent resistance to fireblight and mildew. Sunset zones 1-11, 14-21.

PRAIRIFIRE CRABAPPLE *Malus* 'Prairifire' Crimson buds followed by long-lasting single, hot pink blossoms. Persistent dark red fruit. New foliage is reddish-maroon, aging to reddish-green. Highly resistant to fireblight, scab, cedar apple rust, and powdery mildew. 20' x 20'

QUAKING ASPEN *Populus tremuloides* Very distinctive tree - light green round leaves flutter and shimmer in the slightest breeze. Fast growing, 30' tall, 15' wide. Smooth bark, light grayish to white. Bright yellow fall color. Sunset zones 1-7.

KRAUTER VESUVIUS FLOWERING PLUM *Prunus cer.* 'Krauter Vesuvius' Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree, 18' high, 12' wide. Favorite

purple-leaf plum for California. Foliage of newly planted tree sometimes greenish until vigorous growth begins.

ARISTOCRAT FLOWERING PEAR *Pyrus calleryana* 'Aristocrat' Showy snow-white blossoms in spring. Attractive, glossy foliage turns purplish-red in fall. Fast-growing pyramidal shape, to 40' or more. Narrower than Bradford.

BRADFORD FLOWERING PEAR *Pyrus calleryana* 'Bradford' One of the most popular ornamental deciduous trees. Snow-white bloom in the spring. Attractive, glossy foliage turns red in the fall. Moderately upright growth to 40' tall and 20' wide.

SCARLET CURLS WILLOW *Salix mats.* 'Tortuosa' x 'Scarcuzam' A small, vigorous tree with twisted, golden branches and scarlet stems. Color shows best after first frost. Unique curly green leaves create interest throughout the growing season. 30' x 20'.

WEeping WILLOW *Salix babylonica* Fast-growing, cold hardy, short dormant period. Long narrow leaves, pronounced weeping growth habit. Needs plenty of water. Stake high to develop usable area underneath. 30'x30' or larger.

'FAN GIANT BLUE' WILLOW *Salix blanda* 'Fan Giant' Reported to be less susceptible to borers than *Salix babylonica*. Very vigorous, leaves bluish-green, broader than *S. babylonica*. Growth habit somewhat less weeping. 40-50'. Wider than tall.

VINES & SHRUBS

COOKE'S PURPLE WISTERIA *Wisteria sinensis* 'Cooke's Purple' Lightly fragrant purple flowers. Spring bloom, and again late summer. 25-30' long. Full sun, part shade. Deciduous vine.

BLUE WISTERIA *Wisteria sinensis* 'Blue' Lightly fragrant blue flowers. Spring bloom, and again late summer. Fast growth 25-30 ft. long. Sun or part shade. Deciduous vine. Will bloom in considerable shade.

PINK WISTERIA *Wisteria sinensis* x *floribunda* 'Rosea Beni Fuji' Lightly fragrant pink flowers. Spring bloom, and again late summer. Fast growth to 25-30' long. Full sun to part shade. Deciduous vine.

PURPLE VENUSTA WISTERIA *Wisteria venusta* 'Violacea' Strongly scented, blue-violet flowers in early spring. Fast growth to 25-30' long. Full sun to part shade. Deciduous vine.

WHITE WISTERIA *Wisteria floribunda* 'Longissima Alba' Fragrant white flowers. Spring bloom, and again late summer. Fast growth to 25-30' long. Full sun to part shade. Deciduous vine.

CONTORTED FILBERT *Corylus avellana* 'Contorta' (Harry Lauder's Walking Stick) Very unusual and distinctive small tree to 8-10 ft. Picturesquely twisted and gnarled branches, small leaves. Interesting container plant. Sunset zones 1-9, 14-20.

PINK FLOWERING ALMOND Deciduous shrub with fantastic double pink flowers in early spring. Upright growth to 6 ft. tall and wide.

ALTHEAS

Hibiscus syriacus varieties

Deciduous shrubs, 10-12' tall, with summer flowers. Sunset zones 1-21.

ARDENS ALTHEA Double pink to blue flowers w/red throat.

APHRODITE Single large, pink flowers with prominent burgundy red eye.

HELENE Single large, white flowers with prominent magenta red eye.

LILACS

ALPHONSE LAVALLEE LILAC Double flowers that open as intense blue then turn to lavender. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 8-10' bush.

CHARLES JOLY LILAC Double reddish-purple flowers with attractive heart-shaped foliage. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 8-10' bush.

CRYSTAL WHITE LILAC Stunning white flowers with long lasting blooms. Full sun (light shade in the hottest areas), alkaline soil, and average water. 8-10' bush.

KATHERINE HAVEMEYER LILAC Double pink flowers. Full flowering and color reached in 2-3 years. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

KRASAVITSA MOSKVY LILAC "Beauty of Moscow" Lavender-rose tinted buds open to creamy white double flowers. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

LUDWIG SPAETH LILAC Reddish-purple to dark purple single flowers. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush. Full flowering and true color in 2-3 years.

MADAME LEMOINE LILAC Double white flowers. Full flowering and color reached in 2-3 years. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

MONTAIGNE LILAC Double, light pink to mauve flowers with white in the florets. Very fragrant. Long, narrow clusters of bloom. Upright, open growing shrub. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-12' bush.

PRESIDENT GREVY LILAC Double blue flowers. Full flowering and color reached in 2-3 years. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

PRESIDENT LINCOLN Claimed to be the best single blue lilac. Vigorous, vase-shaped plant. Very fragrant. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

SENSATION LILAC Single wine-red flowers edged with white. Full flowering and color reached in 2-3 years. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

SUNDAY LILAC Purple-pink flowers that produced on both branch tips and lateral buds giving the appearance of extremely large flowers. Full flowering and color reached in 2-3 years. Plants bloom best after cold winters. Full sun (light shade in the hottest areas), alkaline soil, and average water. 10-15' bush.

TINKERBELLE LILAC Wine-red flower buds that open to pink. Pleasing spicy fragrance. Full sun (light shade in the hottest areas), alkaline soil, and average water. 5-6' bush.

YANKEE DOODLE LILAC Single very deep, dark purple flowers. Profuse bloomer with large clusters of flowers. Full sun (light shade in the hottest areas), alkaline soil, and average water. 8' bush.

CONIFER SEEDLINGS

DOUG FIR *Pseudotsuga menziesii* 50 ft. tall, 20-30 ft. wide. Full sun or light shade. Sunset zones 1-10, 14-17.

RED FIR *Abies magnifica 'Shastens'* 80 ft. tall, 30-40 ft. wide. Also known as Silver Tip. Needs afternoon shade. Sunset zones 1-7.

WHITE FIR *Abies concolor* 80-120 ft. tall, 30-50 ft. wide. Filtered sun or afternoon shade. Sunset zones 1-9, 14-24.
