FRONT YARD NURSERY

FRUIT TREES

ARKANSAS BLACK SPUR APPLE  
Large, later season. Dark red skin, high quality even where summer nights are warm. For dessert and cooking. Keeps many months. 800 hours. Partly self-fruitful.

BRAEURN APPLE  

FUJI APPLE  

GALA APPLE (original Gala)  
Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish over yellow. Early harvest. Good Pollinizer for other varieties. Adapted to cold and warm winter climates. Less than 500 hours. Self-fruitful.

GOLDEN DELICIOUS APPLE (Yellow Delicious)  

GRANNY SMITH APPLE  
Large, late, green, crisp, tart, excellent keeper. Requires long summer, thrives in hot climates. 600 hours. Good Pollinizer for other apples. Self-fruitful.

GRAVENSTEIN APPLE (Red Gravenstein)  
Famous for sauce and baking, also used fresh. Crisp, juicy flavor, tart green with red stripes. Early bloom, early harvest. 700 hours. Pollen sterile. Pollinizer required – Empire, Fuji, Gala, Red Delicious.

HONEYCRISP APPLE  
Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy, with aromatic flavor. Striped red over yellow color. Stores well. Ripens in late September to late October. Pollinated by Fuji, Gala, or Golden Delicious.

JONAGOLD APPLE  

PINK LADY APPLE (Cripps Pink)  
New hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late Oct in Central Calif. Self-fruitful. 4-500 hours.

PINK PEARL APPLE  
Unusual pink-fleshed, highly aromatic fruit. Medium size, cream and pale green skin, sometimes blushed red. Tart to sweet-tart, depending on time of picking. Early fall harvest. Good keeper. Makes colorful, tasty applesauce. 600 hours. Pollinizer required.

RED DELICIOUS APPLE (Bisbee spur)  

RED FUJI APPLE (BC#2)  

SIERRA BEAUTY APPLE  
Favorite late apple in No. Calif. Yellow with red blush, rich sprightly flavor, moderately sweet. Excellent fresh or cooked. 700-800 hours. Self-fruitful.

APRICOT

BLENHEIM (ROYAL) APRICOT  
All-purpose freestone, sweet, aromatic, flavorful. Long time #1 apricot in California. Early bloom. Late June harvest in Central Calif. 500 hours. Self-fruitful.

HARCOT APRICOT  
From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid-June in Central Calif. Sweet, juicy, rich flavor - one of the best. 700 hours. Self-fruitful.

HARGLOW APRICOT  
Late-blooming, productive tree, proven producer in coastal Northwestern climates. Medium size, bright orange fruit sometimes blushed red. Orange freestone flesh is firm, sweet, flavorful. Resistant to perennial canker and brown rot, resists cracking. 800 hours. Self-fruitful.

PUGET GOLD APRICOT  
Proven producer of large, flavorful fruit in Western Wash. Recommended for climates where spring rains and frosts limit apricot culture. August harvest. 600 hours. Self-fruitful.
**CHERRY**

**BING CHERRY**  Large, firm, juicy, sweet, nearly black when ripe.  - superb flavor.  #1 cherry.  Mid-season.  Large, vigorous tree.  700 hours.  Pollinized by Black Tartarian, Van, Rainier.  Also Stella in colder climates.

**BLACK TARTARIAN CHERRY**  Medium-sized, nearly black, sprightly flavor, early season.  Vigorous, productive tree.  700 hours.  Pollinizer required - interfruitful with all popular sweet cherries.

**CRAIG’S CRIMSON CHERRY**  Taste test winner.  Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry.  Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture.  Mature tree size about 2/3 of standard.  Mid-season.  800 hours.

**LAPINS CHERRY**  Self-fruitful dark red sweet cherry.  Large, firm, good flavor.  Similar to Van in color, Bing in shape.  Great pollinator for Bing.  Sometimes sold as “Self-fruitful Bing.”  800 hours.

**MONTMORENCY SOUR CHERRY**  Large, light red skin with yellow flesh.  Prefect for cobbler, pies, etc.  Extremely winter hardy and very heavy bearing.  700 hours.  Self-fruitful.

**ROYAL CRIMSON CHERRY**  Low chill cherry.  Bright red, sweet, superb flavor.  Self-fruitful.

**UTAH GIANT CHERRY**  Best sweet cherry, according to Utah folks.  Larger, firmer, more flavorful than Bing or Lambert.  Good canner.  Does not double.  800 hours.  Pollinizer required.  Bing, Lambert, Rainier, Van.

**BLACK MISSION FIG**  (AVAILABLE POTTED ONLY)  The favorite.  Purplish-black skin, strawberry colored flesh, rich flavor.  Heavy bearing, long-lived, large tree.  Coast or inland.  Fresh/dry/can.  100 hours.  Self-fruitful.

**CHICAGO HARDY FIG**  (AVAILABLE POTTED ONLY)  Purple brown fig with great flavor.  Cold good tolerance, can die back to the ground and come back and fruit the next season.  Fruit produces on next season’s summer growth.  Self-fruitful.

**DESERT KING FIG**  (AVAILABLE POTTED ONLY)  Large green fruit with strawberry flesh.  Excellent quality.  Does best in cooler coastal climate, and does well in colder climates or higher elevations.  Sets a large early crop between late June to August.  Has a second crop in warm areas.  Self-fruitful.

**FLANDERS FIG**  (AVAILABLE POTTED ONLY)  Highly productive, violet-striped fruit with white flecks.  Richly flavored amber flesh that is resistant to splitting.  100 hours.  Self-fruitful.

**IMPROVED BROWN TURKEY FIG**  (AVAILABLE POTTED ONLY)  Large, brown skin, pink flesh.  Sweet, rich flavor, used fresh.  Widely adapted, coast or inland climate.  Small tree, prune to any shape.  100 hours.  Self-fruitful.

**LATTERULA FIG**  (AVAILABLE POTTED ONLY)  Also known as Italian Honey Fig.  Greenish yellow fruit; sweet, amber, honey colored flesh.  Good for fresh eating, canning or drying.  Ripens two crops in most years during July and Sept.

**PETER’S HONEY FIG**  (AVAILABLE POTTED ONLY)  Light yellow-green fruit with outstanding sweet, dark amber flesh.  Originally from Sicily.  Self-fruitful.

**VIOLETTE de BORDEAUX**  (AVAILABLE POTTED ONLY)  Large, almost black, fruit with a very deep red pulp.  Produces two crops.  Excellent fresh or dried.  Good for container culture or small spaces.

**HONEY JAR JUJUBE**  (AVAILABLE POTTED ONLY)  Fruit extremely sweet, apple flavor.  Tree is hardy, drought resistant, pest free.  Requires long, hot summer.  Estimated Ready Date: August 2019.  See note page 19.*

**BLACK BEAUTY MULBERRY**  (AVAILABLE POTTED ONLY)  The tasty, blackberry-like fruit is large, black and juicy.  Very attractive to birds.  Some drought tolerance when established.  This Persian mulberry is semi-dwarf to 15ft. high.  Estimated Ready Date: August 2019.  See note page 19.*

**BLACK DWARF MULBERRY**  (AVAILABLE POTTED ONLY)  The tasty, blackberry-like fruit is large, black and juicy.  Very attractive to birds.  Some drought tolerance when established.  This bush form gets 6-8’.

**PAKISTAN FRUITING MULBERRY**  (AVAILABLE POTTED ONLY)  Large dark sweet fruit shaped like blackberries.  Grows at a moderate rate to 20-60’ depending on soil quality and depth.  Drought tolerant once established.  Grows larger and more rapidly with irrigation.  Estimated Ready Date: August 2019.  See note page 19.*

**TEAS WEEPING FRUITING MULBERRY**  (AVAILABLE POTTED ONLY)  Weeping habit with large blackberry like fruit in summer.  Estimated Ready Date: August 2019.  See note page 19.*
NECTARINE
ARCTIC JAY WHITE NECTARINE Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of sugar and acid. 800 hours. Self-fruitful.

DOUBLE DELIGHT NECTARINE Sensational fruit - consistently the best flavored yellow nectarine - plus magnificent, double pink flowers. Dark red-skinned freestone fruit is sweet with unusually rich flavor. Very high scoring in taste-tests. Heavy-bearing tree. Harvest in July in Central Cal. 400-500 hours. Self-fruitful.

FANTASIA NECTARINE Popular, large, yellow freestone. Early harvest fruit is firm, ripe, and tangy; late harvest is sweet with rich flavor. High scoring in taste tests. 500 hours. Self-fruitful.

INDEPENDENCE NECTARINE Bright red skin, firm yellow freestone. Rich flavor, tangy and sweet, one of the best. Winter & frost hardy, very reliable producer. Early July harvest in Central Cal. 700 hours. Self-fruitful.

LIZ'S LATE NECTARINE Sprightly-sweet, intense, spicy flavor - the state of the art in fruit breeding. Late August/early Sept harvest in Central Cal. 600-700 hours. Self-fruitful.

OLIVE
MISSION OLIVE Available potted only. The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollinator.

PEACH
ARCTIC SUPREME WHITE PEACH Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central Cal. 700 hours. Self-fruitful.

DONUT (Stark Saturn) WHITE PEACH SPECIAL ORDER Also called Saucer or Peento Peach. Unique white-fleshed fruit with a sunken center (shaped like a doughnut). Sweet, with a mild flavor described by some as almond-like. Ripens late June/early July in Central Cal. 400-500 hours. Self-fruitful.

DOUBLE JEWEL PEACH Flowering/fruiting peach for home orchard and landscape. Profuse, showy, double pink flowers. Late blooming, but early harvest – late June in Central Cal. Large, richly flavored, yellow freestone. Self-fruitful.

ELBERTA PEACH Famous yellow freestone. Classic, rich, peach flavor: high scoring in taste tests. Use fresh, canned, cooked. Ripen late July/early Aug in Central Cal, up to 3-4 weeks later in colder climates. 800 hours. Self-fruitful.

HALFORD CLING PEACH Large yellow cling fruit, the leading commercial variety. Very good quality. Productive. Early Sept. harvest in Central Cal. 800 hours. Self-fruitful.

INDIAN FREE PEACH Taste test winner at Dave Wilson Nursery fruit tastings. Large freestone, firm cripmm and colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinate.

JULY (KIM) ELBERTA PEACH Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 500 hours. Self-fruitful.

KAWEAH PEACH High yield, large fruit, delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. 500 hours. Mid-late season. Self-fruitful.

O'HENRY PEACH Popular fresh market yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-Aug in Central Cal. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

RELIANCE PEACH Extremely hardy peach with a dull red blush over yellow skin and yellow flesh. Good flavor and very productive. Beautiful late bloom. 750-800 hours. Self-fruitful.

SNOW BEAUTY WHITE PEACH NEW YEAR! Low acid, high sugar, tantalizing flavor. Large, very firm, red skin. Taste test winner. Mid-July harvest in Central Cal. 750-850 hours. Self-fruitful.
PEAR

BARTLETT PEAR World's most popular pear. Early mid-season, about August 1st. High quality, tolerates hot summers. 800 hours. Self-fruitful in most climates of the western U.S. Elsewhere pollinated by Bosc, D'Anjou, Winter Nelis.

COMICE PEAR The gift pack pear. Sweet, aromatic, fine texture, superb flavor & quality - one of the best. Short neck, greenish-yellow skin with red blush. Mid-Sept harvest. 600 hours. Self-fruitful in most of western U.S., or plant with Bartlett.

SENSATION RED BARTLETT PEAR High quality Bartlett-type fruit with attractive red skin. Relatively small tree. 700 hours. Self-fruitful in arid West.

WARREN PEAR Excellent quality dessert pear and highly resistant to fire blight. Med. to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Harvest mid-August. Cold hardy to –20 deg. 600 hours. Self-fruitful.

ASIAN PEAR

20TH CENTURY ASIAN PEAR (Nijisseiki, apple pear) Juicy, sweet, mild-flavored fruit is crisp like an apple. Early to mid-Aug harvest in Central Cal. Keeps well. Easy to grow, heavy bearing small tree. 450 hours. Self-fruitful, or pollinated by Shinseiki, Bartlett, or other.

PLUM & PRUNES

BURGUNDY PLUM Maroon-colored skin and flesh. Sweet with little or no tartness and a very pleasing, mild flavor. High taste test scores. Harvest mid-July to mid-Aug in Central Cal. Very productive. Narrow, upright habit. 400 hours. Self-fruitful.

ELEPHANT HEART PLUM Home-orchard favorite — large, heart-shaped fruit with sweet, juicy, rich flavor, firm red flesh. Dark reddish-purple mottled skin. Long harvest season -Sept in Central Cal. Hardy, heavy-bearing. 500 hours. Pollinate with Beauty or Santa Rosa.

EMERALD BEAUT PLUM One of the highest-rated plums in tastings at Dave Wilson Nursery. Light green skin, yellow to orange freestone flesh. Harvest begins late Aug., in Central Cal. Ripe fruit continues to sweeten, becomes exceptionally sweet, but remains crisp and crunchy. 600-700 hours. Pollinator required: Beauty, Burgundy, Late Santa Rosa, Flavor King Pluot.

FRENCH IMPROVED PRUNE California’s commercial prune. reddish-purple skin, dark amber flesh. Very sweet, high quality fruit. Dessert/canned/dry. 800 hours. Self-fruitful.

ITALIAN PRUNE Large, purple skin, free stone. Rich flavor, very sweet when ripe — fresh, dried, or canned. Vigorous, cold hardy tree. Late bloom. 800 hours. Self-fruitful.

LATE SANTA ROSA PLUM Medium to large reddish-purple skin, amber flesh. Tart-sweet with rich flavor when fully ripe. Ripe about one month after Santa Rosa. 500 hours. Self-fruitful.

SATSUMA PLUM Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollinated by Santa Rosa or Beauty.

WEPPING SANTA ROSA SEMI DWARF PLUM One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit - long limbs bow gracefully to ground. Easily espaliered. 400 hours. Self-fruitful.

PLUOTS – See HYBRIDS (next page)

POMEGRANATE

AC SWEET POTTED ONLY Flavor is sweet and refreshing, seeds are soft and edible. Ripe fruit can hang for weeks without splitting. Very hardy plant will take temperatures to below zero. One of Utah's favored varieties. Required chill hours 100-200. Self-fruitful.

AMBROSIA POMEGRANATE POTTED ONLY Fantastically huge fruit: up to 3 times the size of Wonderful. Pale pink skin, purple sweet-tart juice, similar to Wonderful. Long-lived, any soil, inland or coastal climate. 150 hours. Self-fruitful.

ARIANA POMEGRANATE NEW THIS YEAR! POTTED ONLY Sweet-tart with great flavor. Medium to large fruit has red skin, dark red arils and very soft seeds. Ripens late September to mid October. 100-200 hours. Self-fruitful.

EVE POMEGRANATE POTTED ONLY Heavy producing red fruiting variety with pink seeds(arils) and excellent taste. Self fertile.

EVERSWEET POMEGRANATE POTTED ONLY Very sweet, virtually seedless fruit. Red skin, clear juice. Harvest late summer through fall. Large, showy, orange-red flowers. 150 hours. Self-fruitful.

PARFIANKA POMEGRANATE POTTED ONLY Large, beautiful bright red fruit with very small edible seeds. Very high quality fruit. 100-200 hours. Self-fruitful.

Continuing Price Breaks for 2019: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Dr., Placerville (530) 626-3494 No mail-order. We do not ship.
PINK SATIN POMEGRANATE NEW THIS YEAR! POTTED ONLY Sweet, fruit-punch flavor, pink to dark red fruit. Medium to large sized fruit with light-pink edible seeds. Its light-colored juice is non-staining. 150 hours. Self-fruitful.

RED SILK POMEGRANATE POTTED ONLY Medium to large fruit with edible seeds that have sweet berry flavor. Semi-dwarf tree sets large crops. Eat fresh or use in cooking. 150-200 hours. Self-fruitful.

WONDERFUL POMEGRANATE POTTED ONLY Large, purplered fruit with a delicious, tangy flavor. Best quality in hot inland climate. Bright red-orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

NECTARINE-PEACH MULTI-BUDDED Pluot 4-N-1
APPLE 6-N-1 ESPALIER
ASIAN PEAR 3-N-1
CHERRY 3-N-1
PLUOT 4-N-1
FRUIT SALAD 4-N-1(Peach, Nectarine, Plum, Apricot)

NECTARINE-PEACH MULTI-BUDDED Necta Zee and Honey Babe, or Nectar Babe and Pix Zee. Miniature Trees. See descriptions under special order Mins (below). Must order by 10/31/18.

CHERRY-PLUM 2-N-1 SPRITE/DELIGHT See fruit descriptions below. Must order by 10/31/18.

MULTI-BUDDED FRUIT TREES Multi-budded fruit trees are those with multiple varieties grafted onto a single tree. They work well in small spaces or if you want many varieties of a specific fruit without the maintenance of multiple trees. All multi-budded trees have varieties that will pollinate each other. We offer the following trees:

APPLE 3-N-1
APPLE 6-N-1 ESPALIER
ASIAN PEAR 3-N-1
CHERRY 3-N-1
PLUOT 4-N-1
FRUIT SALAD 4-N-1(Peach, Nectarine, Plum, Apricot)

HYBRID FRUITS

APRIUM® COT-N-CANDY Apricot-plum hybrid. Reminisces an apricot, but with a distinctive flavor and texture all its own. White flesh is extra sweet and juicy with a plum aftertaste. Ripens one week later than Flavor Delight. Self-fruitful.

APRIUM® FLAVOR DELIGHT Apricot-plum hybrid. Reminisces an apricot, but with a distinctive flavor and texture all its own. High taste-test scores – one of the most flavorful early season fruits. Early June harvest. Less than 300 hours. Self-fruitful, but biggest crops if pollinated by any apricot.

APRIUM® SUMMER DELIGHT Late-season Aprium, ripening from late July-early August. Reliable bearer with great apricot flavor and very juicy -flesh. Self-fruitful. 500 hours

NECTAPLUM SPICE ZEE Nectarine and plum cross. Fruit is slightly acidic and full of sugar giving it a spicy sweet flavor; both plum and nectarine traits are easily detectable. Attractive red leaves. Self-fruitful and very productive variety.

PLUERRY CANDY HEART Plum x Cherry cross. A new fruit type with the sweetness of a cherry and fresh plum flavor. Fruit is larger than a cherry and smaller than a plum. Prolific producer, the fruit will hang on the tree for over a month. Pollinated by Burgundy plum.

PLUOT® DAPPLE DANDY Dependable settler and taste test winner, great plum-apricot flavor. Ripe skin is maroon w/ yellow dapple. August harvest in Central Calif. 400-500 hours. Pollinated by Flavor Supreme pluot, Santa Rosa or Burgundy plum.

PLUOT® FLAVOR KING Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central Calif. Naturally small tree. 400-500 hours. Pollinated by Flavor Supreme, Santa Rosa, or Late Santa Rosa.

PLUOT® FLAVOR QUEEN Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, orange flesh. Prolonged harvest: mid-July thru August. 4-500 hours. Pollinated by early blooming Pluot or Burgundy Plum.

PLUOT® FLAVOR SUPREME Taste test winner. Plum-apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central Cal, about 2 weeks before Santa Rosa. 700-800 hours. Pollinated by Santa Rosa, Late Santa Rosa, or other Pluot.

DWARF & mini TREES

FUJI APPLE DWARF California’s favorite apple. Sweet, very crisp and flavorful, excellent keeper. Ripens mid-September. Excellent Pollinizer for other apple varieties. Grows 9-10 feet tall. Low chilling requirement – less than 500 hours. Self-fruitful.

PIXIE COT APRIOET Genetic Dwarf Compact tree with medium sized fruit of fine quality. Ripens around early June. 600 hours. Self-fruitful.

BING CHERRY Genetic Dwarf Large, firm, juicy, sweet, nearly black when ripe - superb flavor, #1 cherry. Mid-season. Large, vigorous tree. Grows 10-15 feet tall. 700 hours. Pollinated by Black Tartarian, Van, Rainier. Also Stella in colder climates.

NECTARINE NECTAR BABE MINIATURE Excellent quality fruit: mid-season yellow freestone with sweet, rich, delicious flavor. Heavy bearing 5-6 ft. tree. 400-500 hours. Self-fruitful.

NECTARINE ARCTIC BABE MINIATURE NEW THIS YEAR! White-fleshed miniature nectarine. Super-sweet, large size fruit ripens early: late May to early June, 4-6ft. Chill hours less than 700. Self-Fruitful

Continuing Price Breaks for 2019: buy10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Dr., Placerville (530) 626-3494 No mail-order. We do not ship.
EL DORADO MINIATURE PEACH Very high quality, richly-flavored fruit. Yellow freestone, attractive red-blushed skin. Harvest early to mid-June. 4-5 ft. tree. 500 hours. Self-fruitful.

HONEY BABE MINIATURE PEACH Sweet, yellow freestone with rich flavor. Heaving bearing tree reaching 5 feet. Excellent choice for home orchards. 500 hours. Self-fruitful.

NUTS

ALMOND

ALL-IN-ONE GENETIC SEMI-DWARF ALMOND (AVAILABLE POTTED ONLY) No.1 almond for home orchards. Heavy crops of soft-shelled nuts with sweet flavorful kernels. Hot summer required to ripen. 15 ft. tall tree. Very frost hardy. 500 hours. Self-fruitful.

CHESTNUT

COLOSSAL CHESTNUT Thought to be a hybrid of the Asian and European chestnuts. High quality medium to large sized nuts fall easily from the hull, are easy to peel. Large, long-lived, spreading tree. 400-500 hours. Pollinated by Colossal or Nevada seedling.

NEVADA CHESTNUT Pollinizer for the Colossal - also a good producer. One Nevada pollinates 8-10 Colossal trees. Not tolerant of alkaline soil. 500 hours. Pollinated by Colossal.

FILBERT

ETA FILBERT (Hazelnut) One of the newest, disease-resistant introductions from Oregon State University. eta produces abundant crops of tasty, medium-size nuts. Plant with Jefferson for cross-pollination.

JEFFERSON FILBERT (Hazelnut) Latest release from Oregon State with immunity to Eastern Filbert Blight Disease. Produces a heavy yield of large flavorful nuts that fill their shells well. A late bloomer. Cross-pollinate with Eta.

PECAN

MOHAWK PECAN (AVAILABLE POTTED ONLY) Very large, thin-shelled nut, excellent quality. Earliest maturing, so more widely adapted than others. Attractive tree is vigorous, bears young and heavy. Good choice for home planting. 250 hours. Self-fruitful. Estimated Ready Date: August 2018. See note page 19.*

PISTACHIO

KERMAN FEMALE PISTACHIO (AVAILABLE POTTED ONLY) Long hot summers required to ripen. Do not disturb root ball when handling and planting. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollinated by Peters.

PETERS MALE PISTACHIO (AVAILABLE POTTED ONLY) Pollinizer for Kerman. Does not bear fruit. One Peters pollinates up to eleven females (Kerman). Do not disturb root ball when handling and planting. Drought-resistant once established. 800 hours.

WALNUT

CARMELO WALNUT Late leaifying and blooming, adapted to colder climate than Hartley or other popular English walnuts. Very large, well filled nut. 700 hours. Self-fruitful.

CHANDLER WALNUT Developed by UC Davis. Heavy bearing, high quality light-colored nuts. Good choice for backyard tree. Fall harvest. 700 hours. Self-fruitful.

FRANQUETTE WALNUT Last English walnut to leaf out, less susceptible to spring frost damage. Very large tree, excellent for shade. Fair production of well-sealed, thin-shelled, high quality nuts. Pollinizer for Hartley. 700 hours. Self-fruitful.

HARTLEY WALNUT Long-time no. 1 walnut in California for its quality and dependability. Large, thin-shelled, well-sealed nut. Light colored flavorful kernel. 700 hours. Self-fruitful.

IDAHO WALNUT Very large, sweet, excellent eating nut, good quality. Extremely hardy variety withstands extreme cold. Vigorous growth. 300-700 hours. Self-fruitful.

KIWI

ISSAI KIWI (AVAILABLE POTTED ONLY) Fuzzless fruit: no need to peel. Smaller than the standard kiwi, often sweeter. Very high in vitamin C. Much more winter hardy than Hayward. New growth tender to frost, but plant recovers quickly. Often set fruit the first year. Issai is self-pollinating, but not self-fertile. More fruit yield and larger fruit with a male pollinator.

KEN'S RED FEMALE KIWI (AVAILABLE POTTED ONLY) Fruits turn red when ripe. Flesh is red, mild and very sweet. Needs male to ensure fruit set. Low-chill variety. One of the largest hardy kiwis. Space 10’ to 15’ apart on 6’ tall trellis.

HARDY MALE KIWI (AVAILABLE POTTED ONLY) Can survive very low temperatures (hardy). Male is needed for female plant to produce fruit. One male can pollinate several female plants. A pretty vine on its own.
Grapes

**WINE**

**CABERNET SAUVIGNON** Late season red wine grape, small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful.

**MERLOT GRAPE** Black berry, used for distinctive red wines. Best quality in cooler regions. 100 hours. Self-fruitful.

**PINOT NOIR GRAPE** Small black berries that yield the famous French burgundy wines. Requires cool summers, cane pruning. Early harvest. 100 hours. Self-fruitful.

**SYRAH GRAPE** This reddish black grape produces full, rich wines of intense color and flavor. Ripens mid-season (Sept.). Self-fruitful.

**ZINFANDEL GRAPE** For fruity red wines. Medium size, round, juicy, reddish-black berry, early mid-season. Prefers mild winters, cool summer. Heavy bearing. 100 hours. Self-fruitful.

**BLACK MONUKKA SEEDLESS GRAPE** Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Fresh or raisins. Early mid-season. 100 hours. Self-fruitful.

**CANADICE SEEDLESS GRAPE** Red, very sweet, medium-sized fruit. For fresh use or raisins. Ripens in August. 100 hours. Self-fruitful.

**CONCORD SEEDLESS GRAPE** American grape, a sport Concord. Berries very similar to Concord, but seedless (or seeds very rare). Bluish-black skin, green flesh, distinctive Concord flavor. 100 hours. Self-fruitful.

**FLAME SEEDLESS GRAPE** Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens early, before Thompson. Vigorous. 100 hours. Self-fruitful.

**GOLDEN MUSCAT GRAPE** (AVAILABLE POTTED ONLY) Large, egg-shaped berries are pale golden yellow when ripe. Characteristic European Muscat flavor and aroma. 100 hours. Self-fruitful.

**PERLETTE SEEDLESS GRAPE** Pale green berry is crisp and juicy. Larger than Thompson and 2 weeks earlier. Requires less summer heat than Thompson to ripen. 100 hours. Self-fruitful.

**PRINCESS GRAPE** (AVAILABLE POTTED ONLY) Seedless grapes are large, green color, juicy seedless fruit with a nice sweet flavor. Fruits hold well, eat fresh and as raisins. 100 Chill Hours. Self-fruitful.

**THOMPSON SEEDLESS GRAPE** Most popular grape in Calif. & Arizona. Fresh & raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours.

**BERRIES**

**BLUECROP BLUEBERRY** (AVAILABLE POTTED ONLY) No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, flavorful fruit doesn’t drop or crack. Tolerates hot summers if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

**BLUERAY BLUEBERRY** (AVAILABLE POTTED ONLY) Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. Blueberry culture requires soil that is moist, acidic, and high in humus. 800 hours. Self-fruitful. Ripens early to mid-season.

**ELLIOET BLUEBERRY** (AVAILABLE POTTED ONLY) Heaviest bearing variety, and latest to ripen. Medium size berries, slightly tart, will not crack or drop. Upright, vigorous bush. Tolerate hot summer if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

**JUBILEE BLUEBERRY** (AVAILABLE POTTED ONLY) Mid-season. Jubilee bushes are upright and quite compact, with fruit borne on the outer periphery of the bush. 500-700 hours.

**LEGACY BLUEBERRY** (AVAILABLE POTTED ONLY) Late mid-season. Vigorous, upright, high yielding variety that is very consistent yearly. Medium-sized fruit with a very superior flavor and sweetness. Self-fruitful, but plant two varieties for biggest crops.

**MISTY BLUEBERRY** (AVAILABLE POTTED ONLY) Southern Highbush (low chill requirement, tolerates heat). Excellent flavor, early harvest. Does well in inland heat. Blueberry culture requires soil that is moist, acidic, and high in humus.

**O’NEAL BLUEBERRY** (AVAILABLE POTTED ONLY) Southern Highbush (low chill requirement, tolerates heat). Large fruit is especially sweet and flavorful. Early season. Soil must be high in humus. 5-6 ft. bush. 200 hours. Self-fruitful, but plant 2 varieties for biggest crops.

**PINK LEMONADE BLUEBERRY** (AVAILABLE POTTED ONLY) An interesting new variety that bears translucent white berries which mature to bright pink when ripe. Sweet, firm fruit with nice texture.

**SOUTH MOON BLUEBERRY** (AVAILABLE POTTED ONLY) Early season. Southern Highbush variety, vigorous grower. Soil must be high in humus. Chilling requirement is 500 hours. Self-fruitful, but plant 2 varieties for biggest crops.

**TOP HAT BLUEBERRY** (AVAILABLE POTTED ONLY) Similar in shape to a mound-shaped spiraea. Beautiful plant form with fine quality berries. Great ornamental for planters or walkways.

BLACKBERRIES

BLACK SATIN (Thornless) (AVAILABLE POTTED ONLY)

CHESTER (Thornless) (AVAILABLE POTTED ONLY)
Large fruit with very good flavor. Sweet, high quality, and firm. Will not soften, leak, or lose color in hot weather. Late season producer with a very long production season.

LOGANBERRY (Thornless) Medium-large (1 ¼" long, ¾" thick). Lavender-red berry. Does not darken while ripening. Soft, tart, or sour fruit because of high acidity. Excellent for pies, juice, canning and wine making. Ripens in June.

MARION (AVAILABLE POTTED ONLY) Medium to large. Fruit is bright red, firm, very flavorful. Produced on vigorous, trailing canes. Suitable for home freezing and canning. Leading variety in Pacific North-west. Ripens mid-July to mid-August.

NAVAJO (Thornless) (AVAILABLE POTTED ONLY) Medium size and firm with less tart flavor than other thornless berries. Ideal for jams and jellies, juice and wine, and of course, fresh eating. Upright, self-supporting canes are a snap to maintain and exhibit good cold hardiness.

OLALLIE (AVAILABLE POTTED ONLY) Large (1½" long, ¾" thick) shiny black, firm berry. Sweeter and less tart than others. Vigorous grower, very productive. Hardy to 10 degrees F. Low chill requirement. Commercially planted in California for market. Ripens late May to early July.

BOYSENBERRIES

BOYSEN BERRY (Thornless) (AVAILABLE POTTED ONLY) Medium reddish-black berry. A less vigorous grower with lower fruit yields compared to Regular Boysenberry. Good for mild winter areas. Popular with home owners because its thornless. Ripens in June.

CURRANTS

CHERRY The berries are very large, bright dark red, acidic and good. Plants are vigorous, upright and productive.

CRANDALL Old American clove currant variety first introduced in 1888. Larger and sweeter than European black currant. Self-fruitful.

RED LAKE (potted only) Dark red berries, attractive heavy-bearing bushes. Berries hold well on the bush and are ideal for jellies, preserves, tarts, and muffins. Cold-hardy. Ripens in July. Self-pollinating.

GOJI BERRY

Oblong, bright red berries that are sweet and tart, known for their antioxidant and vitamin C qualities. The plant is trailing and easy to maintain. Likes sun to part sun with regular watering. Self-fruitful.

GOOSEBERRIES

BLACK VELVET (potted only) The deep purple fruits are the size of seedless grapes. They are very vigorous in growth. Flavor is very good to excellent when they ripen on the bush. Ripens June-July. Self-fruitful.

HINNOMAI RED (potted only) A unique tart and sweet combination. Tart skin covers the sweet flesh of these tasty, ruby berries, so you can enjoy both flavors. Perfect for making pies and jams. Bushes are heavy producers, even when young. Mildew-resistant and cold-hardy. Ripens in July. Self-fruitful.

WELCOME Noted for its high fruit yields. Medium to large, tart, red gooseberries that ripen in July. Vigorous growth habit. Nearly thornless.

CAPTIVATOR produces very sweet, red berries in large clusters on semi-thornless canes. It has excellent resistance to powdery mildew and is very cold hardy.

RASPBERRIES

ANNE RASPBERRY (AVAILABLE POTTED ONLY) Large-fruited fall bearer that ripens at the same time as Heritage. Fruit holds a pale yellow color and is highly productive.

BABA RED RASPBERRY (AVAILABLE POTTED ONLY) The well-known ever-bearing "Bababerry." Large red berries up to 1", highly regarded for flavor. Much more tolerant of summer heat than other raspberries. Plentiful June harvest followed by smaller crop in fall.

FALL GOLD RASPBERRY (AVAILABLE POTTED ONLY) This ever-bearing variety is sweet and large with golden yellow color. It is a winter hardy selection that harvests in July through the summer months.

HERITAGE RASPBERRY (AVAILABLE POTTED ONLY) (Red) Large, very firm, excellent quality. Moderate early July crop and heavy production of quality early September fruit. An ever-bearing variety with good vigor, hardy canes which do not need staking. The No. 1 fall variety nationwide.

JEWELL BLACK RASPBERRY (AVAILABLE POTTED ONLY) Strong producer of flavorful, medium to large berries. Very adaptable. Early season, beginning in late May to early June depending on climate. Upright habit, no support required. Good disease resistance.

WILLAMETTE RED RASPBERRY (AVAILABLE POTTED ONLY) Tasty, dark red fruit that ripens in mid-summer. Needs well drained soil and mild winters. Popular commercial variety.

Continuing Price Breaks for 2019: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Dr., Placerville (530) 626-3494 No mail-order. We do not ship.
**STRAWBERRIES**

**ALBION** (Everbearing) Known for its very large fruit and conical shape. Pleasant, sweet flavor. Resistant to verticillium wilt and crown rot.

**CHANDLER** (June bearing) Very large, medium red, glossy, attractive finish. Long conical to long wedge shaped. High yielding. Excellent quality fruit, much firmer than Douglas. Excellent coastal variety. Adapted to winter and summer yielding. Excellent quality fruit, much firmer than Douglas.

**EARLIGLOW NEW THIS YEAR** (June bearing) sets and ripens fruit faster than other strawberries. Flavorful, medium-large berries. Extremely resistant to red stele, root rot and verticillium wilt.

**TRISTAR** (Everbearing) Firm, sweetly aromatic, large glossy red berries with excellent flavor. Will bear fruit from summer to fall. Note: Limited supply.

**SMALL VEGGIES & FRUIT**

**ASPARAGUS JERSEY KNIGHT** Perennial vegetable. Prolific all-male strain. Spear tips stay tight past the harvest, for weeks of delectable eating. Super tender. Rust resistant. Performs even in heavy clay soil.

**ASPARAGUS MARY WASHINGTON** Perennial vegetable. Plants take 2-3 years to come into full production, then furnish delicious spears every spring for 10-15 years. Tall, feathery, graceful, highly ornamental plants. Popular variety producing long green spears. Tastes great and has been the most popular asparagus in American gardens for over a century.

**ASPARAGUS SWEET PURPLE** Perennial vegetable. Large spears, less fibrous and sweeter than the green varieties. Mild nutty flavor.

**HORSERADISH** Large, coarse herb cultivated for its roots as a relish. Harvest roots in winter or spring. Mature plant is 3’ x 5’.

**VICTORIA CHERRY RHUBARB** (Seedlings) Vigorous, deep red, heavy thick stalks. Tart flavored, succulent. Great for pies, sauces, and canning. Perennial. Some variation in coloring will be seen from plant to plant.

**ORNAMENTAL TREES**

**AUTUMN BLAZE MAPLE** Acer x freemanii ‘Autumn Blaze’ Dense, oval shaped canopy, green foliage. Fall color is brilliant orange-red. Reaches 50’ x 40’. Sunset zones 1-9, 14-24.

**OCTOBER GLORY MAPLE** Acer rubrum ‘October Glory’ Nearly round canopy, glossy green foliage. Better suited to mild winter and hot summer climates than other maples. Showy red fall color. Ample soil moisture required. Reaches 40’ x 35’.

Sunset zones 1-9, 14-24.

**RED SUNSET MAPLE** Acer rubrum ‘Red Sunset’. Upright growth to 40’. Oval shaped canopy, glossy dark green leaves, bright red or orange-red fall color. Ample soil moisture required. Sunset zones 1-9, 14-17.

**KRAUTER VESUVIUS FLOWERING PLUM** Prunus cer. ‘Krauter Vesuvius’ Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree, 18’ high, 12’ wide. Favorite purple-leaf plum for California. Foliage of newly planted tree sometimes greenish until vigorous growth begins.

**VINES & SHRUBS**

**HOPS CASCADE** Humulus lupulus ‘Cascade’ (AVAILABLE POTTED ONLY) Traditional American aroma hop, used in brewing beer. Well drained soil, full sun. Deciduous vine.

**HOPS CENTENNIAL** Humulus lupulus ‘Centennial’ (AVAILABLE POTTED ONLY) Classic American aroma hop, used in brewing beer. Similar to Cascade but more intense. Well drained soil, full sun. Deciduous vine.

**WISTERIA PINK** (AVAILABLE POTTED ONLY) Wisteria sinensis x floribunda ‘Rosea Beni Fugi’ 12” fragrant pink flowers in spring. 25-30’ long. Full sun, part shade. Deciduous vine.

WHITE FIR  *Abies concolor*  80-120 ft. tall, 30-50 ft. wide.
Filtered sun or afternoon shade.  Sunset zones 1-9, 14-24.
Native.

* POTTED FRUIT TREE NOTES: Some of our fruit trees must be potted and sold once the tree has fully rooted; for Mulberries and Pecans this is around August. This gives certain fruit and nut tree varieties the best chance of success, cuts down on stress to the tree when transplanted and helps to ensure a healthy and thriving product. You can order your tree now and it will be held for you until it is fully rooted in its pot.

BAREROOT SEASON PRICE BREAKS:
Quantities need to be purchased from the following categories:
*No Mix & Match from the categories to receive quantity price breaks.*

*FRUIT TREES
*NUT TREES
*GRAPES
*BLUEBERRIES
